The Meanings Of The Gene Public Debates About Human Heredity Rhetoric Of The:

The Meanings of the Gene Celeste Michelle Condit, 1999 *The Meanings of the Gene* is a compelling look at societal hopes and fears about genetics in the course of the twentieth century. The work of scientists and doctors in advancing genetic research and its applications has been accompanied by plenty of discussion in the popular press from *Good Housekeeping* and *Forbes* to *Ms* and the *Congressional Record* about such topics as eugenics, sterilization, DNA, genetic counseling, and sex selection. By demonstrating the role of rhetoric and ideology in public discussions about genetics, Condit raises the controversial question: Who shapes decisions about genetic research and its consequences for humans: scientists or the public? Analyzing hundreds of stories from American magazines and later television news from the 1910s to the 1990s, Condit identifies three central and enduring public worries about genetics: that genes are deterministic arbiters of human fate; that genetics research can be used for discriminatory ends; and that advances in genetics encourage perfectionistic thinking about our children. Other key public concerns that Condit highlights are the complexity of genetic decision making and potential for invasion of privacy, conflict over the human genetic code, and experimentation with DNA and family genetics and reproductive decisions. Her analysis reveals a persistent debate in the popular media between themes of genetic determinism such as eugenics and more egalitarian views that place genes within the complexity of biological and social life. *The Meanings of the Gene* offers an insightful view of our continuing efforts to grapple with our biological natures and to define what it means and will mean in the future to be human.

Landmark Essays on Rhetoric of Science: Issues and Methods Randy Allen Harris, 2024-11-01 *Landmark Essays in Rhetoric of Science: Issues and Methods* compiles the essential readings of the vibrant field of rhetoric of science, tracing the growth and core concerns of the field since its development in the 1970s. A companion to Randy Allen Harris's foundational *Landmark Essays in Rhetoric of Science: Case Studies*, this volume includes essays by such luminaries as Carolyn R. Miller, Jeanne Fahnestock, and Alan G. Gross, along with an early prophetic article by Charles Sanders Pierce. Harris's detailed introduction puts the field into its social and intellectual context and frames the important contributions of each essay, which range from reimagining classical concepts like rhetorical figures and topical invention to Modal Materialism and the Neomodern hybridization of Actor Network Theory with Genre Studies. Race, revolution, and Daoism come up along the way, and the empirical recalcitrance of the moon. This collection serves as a textbook for graduate and advanced undergraduate courses in science studies and is an invaluable resource for researchers concerned with science not as a special, autonomous, sacrosanct enterprise but as a set of value-saturated, profoundly influential rhetorical practices.

Listening to Beauty Megan Poole, 2025-09-05 A moving study of how encounters with beauty advance scientific discovery. Our attempts to understand the world are always more than simply rational. Our bodies learn through lived experience; our natural environments challenge what we think we know, and we take lessons from our nonhuman kin. Even scientists, often considered paragons of rationality, frequently describe their findings in the language of beauty. For

rhetorician Megan Poole beauty is integral to how scientific research works Drawing on interviews with leading biologists Poole explores what happens when scientists set aside objectivity and listen for beauty around them The wonder we feel at the plumage of birds the melodies of whales or the caretaking of elephants may not help us on its own to isolate a given fact but such encounters may teach us to open ourselves to a different way of knowing entirely Through stories about researchers encounters with wonder Listening to Beauty reveals how scientific discovery happens sometimes unsystematically sometimes incoherently often beautifully

The Material Gene Kelly E. Happe, 2013-05-06 In 2000 the National Human Genome Research Institute announced the completion of a draft of the human genome the sequence information of nearly all 3 billion base pairs of DNA In the wake of this major scientific accomplishment the focus on the genetic basis of disease has sparked many controversies as questions are raised about radical preventative therapies the role of race in research and the environmental origins of illness In *The Material Gene* Kelly Happe explores the cultural and social dimensions of our understandings of genomics using this emerging field to examine the physical manifestation of social relations Situating contemporary genomics medicine and public health within a wider history of eugenics Happe examines how the relationship between heredity and dominant social and economic interests has shifted along with transformations in gender and racial politics social movement and political economy Happe demonstrates that genomics is a type of social knowledge relying on cultural values to attach meaning to the body *The Material Gene* situates contemporary genomics within a history of genetics research yet is attentive to the new ways in which knowledge claims about heredity race and gender emerge and are articulated to present day social and political agendas Kelly E Happe is assistant professor of communication studies and women's studies at the University of Georgia

The Disability Studies Reader Lennard J. Davis, 2006 The second edition of *The Disability Studies Reader* builds and improves upon the classic first edition which has sold well over 6000 copies since 1999 As a field disability studies burst onto the scene across the social sciences and humanities in the 1990s and the first edition of the reader gathered the best work that had been written on the subject including essays by famous authors such as Susan Sontag and Erving Goffman The new edition is more global in its coverage and adds material on genetic testing the human genome queer studies and issues in developing countries The size of the audience has grown since the first edition's publication and the second edition's new material will make it even more useful for courses on the subject Courses on the subject have mushroomed in the past ten years and can now be found across the social sciences humanities and behavioral sciences

Arguing with Numbers James Wynn,G. Mitchell Reyes,2021-04-15 As discrete fields of inquiry rhetoric and mathematics have long been considered antithetical to each other That is if mathematics explains or describes the phenomena it studies with certainty persuasion is not needed This volume calls into question the view that mathematics is free of rhetoric Through nine studies of the intersections between these two disciplines Arguing with Numbers shows that mathematics is in fact deeply rhetorical Using rhetoric as a lens to analyze mathematically based arguments in public policy political and economic theory and even literature the essays in this volume reveal how mathematics influences the values and beliefs with which we assess the world and make decisions and how our worldviews influence the kinds of mathematical instruments we construct and accept In addition contributors examine how concepts of rhetoric such as analogy and visuality have been employed in mathematical and scientific reasoning including in the theorems of mathematical physicists and the geometrical diagramming of natural scientists Challenging academic orthodoxy these scholars reject a math equals truth reduction in favor of a more constructivist theory of mathematics as dynamic evolving and powerfully persuasive By bringing these disparate lines of inquiry into conversation with one another Arguing with Numbers provides inspiration to students established scholars and anyone inside or outside rhetorical studies who might be interested in exploring the intersections between the two disciplines In addition to the editors the contributors to this volume are Catherine Chaput Crystal Broch Colombini Nathan Crick Michael Dreher Jeanne Fahnestock Andrew C Jones Joseph Little and Edward Schiappa

Reengaging the Prospect(s) of Rhetoric Mark J. Porrovecchio,2010-02-25 Reengaging the Prospects of Rhetoric reanimates the debate over the function and scope of rhetoric Providing a contemporary response to the volume The Prospect of Rhetoric 1971 this volume reconceptualizes that classic work to address the challenges facing the study of rhetoric today As a standalone text or a supplemental resource for undergraduate and graduate courses in the history theory and criticism of rhetoric or contemporary rhetorical theory it will help to shape rhetoric s future role in communication studies and will foster interdisciplinary dialogues about the topic

Claiming the Bicycle Sarah Hallenbeck,2016 This book considers how American women encouraged one another to adopt a new technology the bicycle adapt it to their own purposes and use it to transform cultural assumptions about femininity and

gender difference It also considers the role of women s rhetorical agency in the transformation of bicycle culture and the bicycle itself

The State of Rhetoric of Science and Technology Alan G. Gross, Laura J. Gurak, 2020-08-26 The ubiquity of the Internet and digital technology has changed the sites of rhetorical discourse and inquiry as well as the methods by which such analyses are performed This special issue discusses the state of rhetoric of science and technology at the beginning of the twenty first century While many books connecting rhetorical theory to the Internet have paved the way for more refined and insightful studies of online communication the articles here serve as a reflective moment an opportunity to consider thoughtful statements from those who have published and been influential in the field

The Meanings Of The Gene Public Debates About Human Heredity Rhetoric Of The: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. The Meanings Of The Gene Public Debates About Human Heredity Rhetoric Of The : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
