developments becoming in turn the tail end of the feudal communal imperial versus papal era or the announcement of modernity The Later Middle Ages addresses the urgent need to revise and rewrite the story of this period forging new critical and technical vocabularies not derived from the study of other periods By adopting a conscious approach towards temporal and spatial variety and by breaking the traditional and unitary narrative of decline and transition into one of many changes and continuities it charts the principal developments of late medieval Europe while opening up to different political cultures and societies throwing new light on older concepts and revealing analogies and differences with other geopolitical contexts Including maps illustrations a detailed chronology and a rich range of reading suggestions The Later Middle Ages aims at providing a first introduction to a very complex dynamic and fascinating period for Europe and beyond *The Middle Ages* Mikael Eskelner, When we talk about the Middle Ages we talk about a historical period that extends from the 5th century to the 15th century Ten centuries of history that begins with the fall of the Roman Empire of the West in the year 476 A D and that is terminated at the end of the fifteenth century in 1492 with the discovery of the American continent The Middle Ages was a period of European history that left deep traces on the continent Marked by important historical events the beginning and end of this period was marked by major cultural political religious social and economic changes becoming one of the most fascinating periods in history **Agriculture in the Middle Ages** Martin Bakers, In the Middle Ages agriculture underwent many changes The nobles and the clergy were considered the most important members of the feudal society However they were never the majority in the Middle Ages almost all people were peasants Not all farmers had the same category and social status Many of them were free men Among these some were small landowners who lived on their own land while others the settlers leased the feudal lord a small plot of land **Early Modern Jewish Civilization** David Graizbord, 2024-09-18 This collection is an introductory historical survey and selective cultural analysis of the development coalescence and eventual waning of a diasporic civilization that of the Jews of the early modern period ca 1391 1789 in Europe the Ottoman Empire and key nodes of the Iberian Empires in the Americas Each chapter explores key factors that shaped both distinctive early modern Jewish communities and a remarkably coalescent and far broader community of communities The contributors engage and answer the following questions What do historians mean by early modernity and to what extent does the concept illuminate the history and culture s of Jews from the end of the Middle Ages to the Enlightenment What were the general demographic contours of the Jewish diaspora over this period and how did they change How did culture politics technology economics and gender shape diasporic Jewish communities across eastern and western Europe and the New World over the course of some 400 years Ultimately the work renders a portrait of coherence and diversity continuity and discontinuity in early modern Jewish life within and across temporal and geographic boundaries Early Modern Jewish Civilization is essential reading for all students of Jewish history and civilization and early modern history more broadly **Anthropology and Global History** Robert M. Carmack, 2013-10-11 Anthropology and Global

History explains the origin and development of human societies and cultures from their earliest beginnings to the present utilizing an anthropological lens but also drawing from sociology economics political science history and ecological and religious studies Carmack reconceptualizes world history from a global perspective by employing the expansive concepts of world systems and civilizations and by paying deeper attention to the role of tribal and native peoples within this history Rather than concentrating on the minute details of specific great events in global history he shifts our focus to the broad social and cultural contexts in which they occurred Carmack traces the emergence of ancient kingdoms and the characteristics of pre modern empires as well as the processes by which the modern world has become integrated and transformed The book addresses Western civilization as well as comparative processes which have unfolded in Asia the Middle East Latin America and sub Saharan Africa Vignettes opening each chapter and case studies integrated throughout the text illustrate the numerous and often extremely complex historical processes which have operated through time and across local regional and global settings
