Meeting Place Paul Carter,2013-10-01 In this remarkable and often dazzling book Paul Carter explores the conditions for sociability in a globalized future He argues that we make many assumptions about communication but overlook barriers to understanding between strangers as well as the importance of improvisation in overcoming these obstacles to meeting While disciplines such as sociology legal studies psychology political theory and even urban planning treat meeting as a good in its own right they fail to provide a model of what makes meeting possible and worth pursuing a yearning for encounter The volume s central narrative between Northern cultural philosophers and Australian societies traverses the troubled history of misinterpretation that is characteristic of colonial cross cultural encounter As he brings the literature of Indigenous and non Indigenous anthropological research into dialogue with Western approaches of conceptualizing sociability Carter makes a startling discovery that meeting may not be desirable and if it is its primary objective may be to negotiate a future of non meeting To explain the phenomenon of encounter Carter performs it in differing scales spaces languages tropes and forms of knowledge staging in the very language of the book what he calls passages In widely varying contexts these passages posit the disjunction of Greco Roman and Indigenous languages codes theatrics of power social systems and visions of community In an era of new forms of technosocialization Carter offers novel ways of presenting the philosophical dimensions of waiting meeting and non meeting

Jurisdiction Shaunnagh Dorsett, Shaun McVeigh, 2012-08-21 This book takes its cue from the observation that jurisdiction as the speech of law articulates or proclaims law Without jurisdiction the law would be speechless without authority and authorisation So too would be critics who approach the law or want to live lawfully As a field of legal knowledge and legal practice jurisdiction is concerned with the modes of authority and the manner of the authorisation of law It encompasses the broadest questions of the authority and the founding of legal order as well as the minutest detail of the ordering of the business of the administration and adjudication of justice It gives us both the point of articulation of law and the technological means of the expression of law It gives us too the understanding of the limits of the authority of law as well as the resources for engaging with the plurality of laws and the means of engaging in lawful behaviour A critical approach to law through the forms of authority and action in law provides a means of engaging with the quality of relations created and maintained through law and a means of taking responsibility for the practices of jurisdiction and what is done in the name of the law This book provides a critical and historically grounded elaboration of the key themes of jurisdiction It does so by offering students and scholars of law a form of critical engagement with the technologies devices and forms of jurisdictional ordering It shows how the common has authorised legal relations and bound persons places and events to the body of law It offers a number of resources and engagements of jurisdiction on the basis that a jurisprudence of jurisdiction if it is anything engages forms of human relation
