The Mexico City Reader Americas:

The Mexico City Reader Ruben Gallo, 2009-09-29 Mexico City is one of Latin America's cultural capitals and one of the most vibrant urban spaces in the world. The Mexico City Reader is an anthology of Cronicas short hybrid texts that are part literary essay part urban reportage about life in the capital. This is not the City of Palaces of yesteryear but the vibrant chaotic anarchic urban space of the 1980s and 1990s the city of garbage mafias necrophiliac artists and kitschy millionaires. Like the visitor wandering through the city streets the reader will be constantly surprised by the visions encountered in this mosaic of writings a textual space brimming with life and crowded with flaneurs flirtatious students Indian dancers food vendors fortune tellers political activists and peasant protesters. The essays included in this anthology were written by a panoply of writers from well known authors like Carlos Monsivís and Jorge Ibagüera to younger figures like Fabrizio Mejía Madrid and Juieta García González all of whom are experienced practitioners of the city. The texts collected in this anthology are among the most striking examples of this concomitant theory and practice of Mexico City that most delirious of megalopolises. An exciting literary journey Carolyn Malloy Multicultural Review

Ecological Crisis and Cultural Representation in Latin America Mark Anderson, Zélia M. Bora, 2016-10-04 Worldwide environmental crisis has become increasingly visible over the last few decades as the full scope of anthropogenic climate change manifests itself and large scale natural resource extraction has expanded into formerly remote areas that seemed beyond the reach of industrialization. Scientists and popular culture alike have turned to the term Anthropocene to capture the global scale of environmental and even geological transformations that humans have carried out over the last two centuries. The chapters in *Ecological Crisis and Cultural Representation in Latin America* examine the dynamics and interplay between local cultures and the expansion of global capitalism in Latin America emphasizing the role of art in bearing witness to and generating awareness of environmental and social crises but also its possibilities for formulating solutions. They take particular care to draw out the ways in which local environmental crises in Latin American nations are witnessed and imagined as part of a global system focusing on the problems of time scale and complexity as key terms in conceiving the dimensions of crisis. At the same time they question the notion of the Anthropocene as a species wide human historical project making visible the coloniality of natural resource extraction in Latin America and its dire effects for local people cultures and environments. Taking an ecocritical approach to Latin American cultural production including literature film performance and digital artwork the chapters in this volume develop a notion of ecological crisis that captures not only its documentary sense in the representation of environmental destruction the degradation of the oikos but also the crisis in the modern worldview logos that the acknowledgment of crisis provokes. In this sense crisis is also the promise of a turning point of the possibilities for change. Latin American representations of ecological crisis thus create the conditions for projects that decolonize environments developing new sustainable ways of conceiving of and relating to our world or returning to old ones.

Mapping Latin America Jordana Dym,Karl Offen,2011-12-01 For many a map is nothing more than a tool used to determine the location or distribution of something a country a city or a natural resource But maps reveal much more to really read a map means to examine what it shows and what it doesn t and to ask who made it why and for whom The contributors to this new volume ask these sorts of questions about maps of Latin America and in doing so illuminate the ways cartography has helped to shape this region from the Rio Grande to Patagonia In Mapping Latin America Jordana Dym and Karl Offen bring together scholars from a wide range of disciplines to examine and interpret more than five centuries of Latin American maps Individual chapters take on maps of every size and scale and from a wide variety of mapmakers from the hand drawn maps of Native Americans to those by famed explorers such as Alexander von Humboldt to those produced in today s newspapers and magazines for the general public The maps collected here and the interpretations that accompany them provide an excellent source to help readers better understand how Latin American countries regions provinces and municipalities came to be defined measured organized occupied settled disputed and understood that is how they came to have specific meanings to specific people at specific moments in time The first book to deal with the broad sweep of mapping activities across Latin America this lavishly illustrated volume will be required reading for students and scholars of geography and Latin American history and anyone interested in understanding the significance of maps in human cultures and societies
