Models of Autonomy Yā'āqov Dīnā'ā'ēin, In 1938 Eliezer Yapou

Soviet Decision Making in Practice Ya'acov Ro'i, The Soviet Union executed an apparent about face in its traditional anti Zionist position when the Palestine issue came before the United Nations in 1947 In addition to political support at the UN from May 1947 to May 1949 important military assistance was rendered to the Jewish Palestinian Yishuv throughout 1948 by the Eastern bloc Toward the end of that year however indications of change became apparent and the Soviet Union began criticizing Israel This book studies the USSR's attitude toward the establishment of a Jewish state in Palestine in the immediate post World War II period and toward Israel in the first years of its existence and it investigates the complex of considerations that caused the initial apparent reversal of traditional Soviet anti Zionism The author contends that this

support for Israel contributed considerably to the evoking of Soviet Jewry's enthusiastic reaction to the establishment of the State. But this very reaction resulted in turn in Moscow changing its tactics again since it could not allow its Jewish citizens to identify with a state outside the Soviet Union and the Communist orbit. During the few years after the Israeli War for Independence in which the Arab-Israeli conflict was relatively low key the USSR adopted a position of seeming neutrality between two sides while quietly wooing the Arab nations. Ro'i examines how toward the end of the Stalin period the Jewish problem again intervened with the infamous Doctor's Plot and how early in 1953 the Soviet Union severed diplomatic relations with Israel. One year later the USSR cast its first two pro-Arab vetoes in the UN Security Council and from this point on Soviet-Israeli relations openly became a function of the increasingly cordial Soviet friendship with the Arab world.

Colossus Niall Ferguson, 2005-03-29 Is America an empire? Certainly not according to our government. Despite the conquest of two sovereign states in as many years despite the presence of more than 750 military installations in two thirds of the world's countries and despite his stated intention to extend the benefits of freedom to every corner of the world George W. Bush maintains that America has never been an empire. We don't seek empires insists Defense Secretary Rumsfeld. We're not imperialistic. Nonsense says Niall Ferguson. In *Colossus* he argues that in both military and economic terms America is nothing less than the most powerful empire the world has ever seen. Just like the British Empire a century ago the United States aspires to globalize free markets the rule of law and representative government. In theory it's a good project says Ferguson. Yet Americans shy away from the long term commitments of manpower and money that are indispensable if rogue regimes and failed states really are to be changed for the better. Ours he argues is an empire with an attention deficit disorder imposing ever more unrealistic timescales on its overseas interventions. Worse it's an empire in denial a hyperpower that simply refuses to admit the scale of its global responsibilities. And the negative consequences will be felt at home as well as abroad. In an alarmingly persuasive final chapter Ferguson warns that this chronic myopia also applies to our domestic responsibilities. When overstretch comes he warns it will come from within and it will reveal that more than just the feet of the American colossus is made of clay.
