The Politics of Ecosuicide Leslie L. Roos (Jr.),1971 The Context of Environmental Politics Harold Sprout,Margaret Sprout,2021-11-21 Now familiar to all is the cry that present rates of pollution ecological disruption and depletion of resources are leading inevitably to worldwide disaster A multitude of immediate needs however compete for the staggering sums required to save the environment and the reduction of consumption which must accompany such expenditures holds little popular appeal The decisions therefore must ultimately be political ones but what choices are governments to make Here is the essence of what Professors Harold and Margaret Sprout term the statesmen s dilemma These noted scholars examine the dilemma in detail exploring a wide range of points of view and developing a reasoned philosophical stance of their own While their account of what is happening to the world and what we are doing about it is a gloomy one it is notable that the authors do not entirely despair of man s future In an epilogue they propose a number of measures which with luck might enable coming generations to inherit a share of the earth s bounty The Context of Environmental Politics is the first volume of The Third Century Series a group of books exploring the major issues and challenges confronting the United States as it enters its third century **EPA-600/5** ,1973-11 **The Ecological Modernization Capacity of Japan and Germany** Lutz Mez,Lila Okamura,Helmut Weidner,2019-08-10 Cognitive strategic capabilities of a country are decisive for overcoming the strong path dependence in climate related policies and to achieve ecological and economic modernization This is the result of a unique comparison approach focusing on four highly intertwined policy areas Automobiles Nuclear Energy Renewables and Rare Earth in Japan and Germany Both countries have in principle sufficient economic technological and institutional capacities for an ecological transformation but they are lacking an integrated policy strategy to mobilize and organize the existing capacities in favor of structural changes The focused four policy areas are analyzed in depth and compared by experts from political science **A Policy Approach to Political Representation** Helen M. Ingram,Nancy K. Laney,John R. McCain,2013-10-18 Analyzes the extent to which the voters of Colorado New Mexico Arizona and Utah are concerned about problems associated with development and the extent to which state senators respond to voters concerns Originally published in 1980 **The Politics of Environmental Concern** Walter A. Rosenbaum,1977 **Housing and Planning References** ,1972 **Environmental Inequalities** Andrew Hurley,2009-11-30 By examining environmental change through the lens of conflicting social agendas Andrew Hurley uncovers the historical roots of environmental inequality in contemporary urban America Hurley s study focuses on the steel mill community of Gary Indiana a city that was sacrificed like a thousand other American places to industrial priorities in the decades following World War II Although this period witnessed the emergence of a powerful environmental crusade and a resilient quest for equality and social justice among blue collar workers and African Americans such efforts often conflicted with the needs of industry To secure their own interests manufacturers and affluent white suburbanites exploited divisions of race and class and the poor frequently found

themselves trapped in deteriorating neighborhoods and exposed to dangerous levels of industrial pollution In telling the story of Gary Hurley reveals liberal capitalism s difficulties in reconciling concerns about social justice and quality of life with the imperatives of economic growth He also shows that the power to mold the urban landscape was intertwined with the ability to govern social relations *Catalog of Copyright Entries.
