The Power Of Institutions Political Architecture And Governance Cornell Studies In Political Economy:

The Power of Institutions Andrew MacIntyre, 2018-08-06 Conventional wisdom holds that institutions matter Here Andrew MacIntyre reveals exactly how they matter in the developing world Combining an eye for current concerns in international politics with a deep knowledge of Southeast Asia MacIntyre explores the impact of institutions on effective governance He examines the national political architecture the complex of rules that determine how leadership of a state is constituted and how state authority is exercised The Power of Institutions sets out an intriguing conundrum one well established body of literature decries the evils of highly centralized political systems while an equally vigorous school of thought outlines the dangers of political fragmentation MacIntyre presents the problems associated with institutional extremes common in developing countries as the power concentration paradox Either extreme is likely to be associated with distinctive governance problems MacIntyre illustrates his wider arguments by focusing on Indonesia Malaysia the Philippines and Thailand He shows how their diverse political architectures influenced their responses to the Asian economic crisis and played into pressures for political reform The Power of Institutions makes clear why the configuration of political institutions is one of the most pressing challenges in many parts of the developing world today The Political Economy of Capital

Governing Finance Andrew Walter, 2011-03-15 The international financial community blamed the Asian crisis of 1997 1998 on deep failures of domestic financial governance To avoid similar crises in the future this community adopted and promoted a set of international best practice standards of financial governance The G7 asked specialized public and private sector bodies to set international standards and tasked the International Monetary Fund and the World Bank with their global dissemination Non Western countries were thereby encouraged to emulate Western practices in banking and securities supervision corporate governance financial disclosure and policy transparency In Governing Finance Andrew Walter explains why Indonesia Malaysia South Korea and Thailand key targets and test cases of this international standards project were placed under intense pressure to transform their domestic financial governance Walter finds that the depth of the economic crisis and more enduring aspects of Asian capitalism such as family ownership of firms made substantive compliance with international standards very costly for the private sector and politically difficult for governments to achieve In spite of international compliance pressure the result was varying degrees of cosmetic or mock compliance In a book containing lessons for any agency or country attempting to implement lasting change in financial governance Walter emphasizes the limits of global regulatory convergence in the absence of support from domestic politicians institutions and firms **The China Boom and Its Discontents** Ross Garnaut, Ligang Song, 2005-10-01 China is shaping the global

Economic Crises and the Breakdown of Authoritarian Regimes Thomas B. Pepinsky, 2009-08-17 Why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed In this book Thomas B Pepinsky uses the experiences of Indonesia and Malaysia and the analytical tools of open economy macroeconomics to answer this question Focusing on the economic interests of authoritarian regimes supporters Pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises When asset specificity divides supporters as in Indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime collapse When coalitions are not divided by asset specificity as in Malaysia regimes adopt radical adjustment measures that enable them to survive financial crises Combining rich qualitative evidence from Southeast Asia with cross national time series data and comparative case studies of Latin American autocracies Pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change
