*School Desegregation in the 21st Century* Christine H. Rossell, David J. Armor, Herbert J. Walberg, 2002-09-30 Leading scholars in the fields of history and law have assembled an enormous amount of empirical data on the outcomes of school desegregation and conclude that the policies of the past mandatory reassignment and strict racial quotas had too few benefits and too many costs to make them viable alternatives for the future Chapter topics include the history of school desegregation the development of the law the desegregation effectiveness of remedies ability grouping and classroom desegregation racial disparities in school discipline intergroup relations the attitudes and opinions of adults in desegregated school districts and the outlook for the future The authors conclude that one of the biggest successes of school desegregation is that there is almost universal acceptance of the principle that racial discrimination is immoral But school desegregation has had some important failures as well most importantly the failure to improve the academic achievement of black students and race relations between black and white students in desegregated schools There have also been some serious costs white flight and protest voting associated with forced busing and the use of strict racial quotas The concluding chapter argues that the solution to racial disparities in achievement and to racial separation lies in compensatory education for low achieving poor children and school choice programs that do not use racial criteria but provide financial assistance to low income families      The Impact of School Desegregation Policies on White Public School Enrollment, 1968-1976 Franklin D.

Wilson, 1982      The Science and Law of School Segregation and Diversity Roger J. R. Levesque, 2018 The Science and Law of School Segregation and Diversity examines the sources of the disconnect between scientific findings on school segregation and how the U S legal system addresses it evaluates these sources empirical and legal foundations explains why they persist and reveals what can be done about them      School desegregation United States. **Resources in Education** ,1985      Social Research in the Judicial Process Wallace D. Loh,1984-09-17 How to inform the judicial mind Justice Frankfurter remarked during the school desegregation cases is one of the most complicated problems Social research is a potential source of such information Indeed in the 1960s and 1970s with activist courts at the forefront of social reform the field of law and social science came of age But for all the recent activity and scholarship in this area few books have attempted to create an intellectual framework a systematic introduction to applied social legal research Social Research in the Judicial Process addresses this need for a broader picture Designed for use by both law students and social science students it constructs a conceptual bridge between social research the realm of social facts and judicial decision making the realm of social values Its unique casebook format weaves together judicial opinions empirical studies and original text It is a process oriented book that teaches skills and perspectives cultivating an informed sensitivity to the use and misuse of psychology social psychology and sociology in appellate and trial adjudication Among the social legal topics explored are school desegregation capital punishment jury impartiality and eyewitness identification This casebook is remarkable for its scope its accessibility and the intelligence of its conceptual integration It provides the kind of interdisciplinary teaching framework that should eventually help lawyers to make knowledgeable use of social research and social scientists to conduct useful research within a legally sophisticated context
