Assessing Affective Characteristics in the Schools Lorin W. Anderson, Sid F. Bourke, 2013-05-13 The affective realm is a critical but often forgotten aspect of schooling The development of character and the formation of appropriate learning environments rely to a large extent on understanding the affective nature of students Even when the focus is on cognitive achievement affect has a role to play Teachers frequently mention a lack of motivation as a primary reason for students not achieving as well as they should or as well as their teachers would like Despite the importance of affect educators rarely make an effort to systematically collect and use information about students affective characteristics to better understand students and to substantially improve the quality of education they receive This book s purpose is to provide educators with the knowledge and skills they need to design and select instruments that can be used to gather information about students affective characteristics Once valid and reliable information has been gathered it can be used to aid in understanding and to improve educational quality The second edition features an updated list of affective characteristics i e attitudes values interests self esteem self efficacy locus of control a dual emphasis on selecting and designing affective assessment instruments an emphasis on multi scale instruments i e a single instrument with multiple affective scales the use of a single small data set to illustrate and foster understanding of key concepts and procedures a dual emphasis on data about individual students and groups of students a dual focus on the instrumental value of affective data and the inherent value of affective data i e affect is valuable in and of itself

Realizing the Distinctive University Mark William Roche, 2017-02-28 In Realizing the Distinctive University Vision and Values Strategy and Culture Mark William Roche changes the terms of the debate about American higher education A former dean of the College of Arts and Letters at the University of Notre Dame Roche argues for the importance of an institutional vision not simply a brand and while he extols the value of entrepreneurship he defines it in contrast to the corporate drive toward commercialization and demands for business management models Using the history of the German university to assess the need for and implementation of distinctive visions at American colleges and universities Roche's own vision benefits from his deep connection to both systems as well as his experience in the trenches working to realize the special mission of an American Catholic university Roche makes a significant contribution by delineating means for moving such an institution from vision to implementation Roche provides a road map to creating a superb arts and sciences college within a major research university and offers a rich analysis of five principles that have shaped the modern American university flexibility competition incentives accountability and community He notes the challenges and problems that surface with these categories and includes ample illustration of both best practices and personal missteps The book makes clear that even a compelling intellectual vision must always be linked to its embodiment in rhetoric support structures and community Throughout this unique and appealing contribution to the literature on higher education Roche avoids polemic and remains optimistic about the ways in which a faculty member serving in administration can make a positive difference Realizing the Distinctive University is a must read for academic administrators faculty members interested in the inner workings of the university and graduate students and scholars of higher education
