Hidden rituals and public performances Anna-Leena Siikala, Oleg Ulyashev, 2011-08-22 Why are Khanty shamans still active? What are the folklore collectives of Komi? Why are the rituals of Udmurts performed at cultural festivals? In their insightful ethnographic study, Anna Leena Siikala and Oleg Ulyashev attempt to answer such questions by analysing the recreation of religious traditions, myths, and songs in public and private performances. Their work is based on long-term fieldwork undertaken during the 1990s and 2000s in three different places: the Northern Ob region in North West Siberia and in the Komi and Udmurt Republics. It sheds light on how different traditions are favoured and transformed in multicultural Russia today. Siikala and Ulyashev examine rituals, songs, and festivals that emphasize specificity and create feelings of belonging between members of families, kin groups, villages, ethnic groups, and nations, and interpret them from a perspective of area, state, and cultural policies. A closer look at post-Soviet Khanty, Komi, and Udmurts shows that opportunities to perform ethnic culture vary significantly among Russian minorities with different histories and administrative organisation. Within this variation, the dialogue between local and administrative needs is decisive. *The Estate House Re-designed* Anthony Sully, 2018-08-07 The book demonstrates how new houses can be designed to be more sustainable and ergonomic. Specifically, it describes a prototype building that could be constructed in the near future. Responding to some of the poor standards of mass estate housing in the UK and its out-of-date space standards, it contributes towards improving the current status quo by describing a house design, including drawings, that can compete with today's mass housing. The author examines the traditional geometrical reliance on the square in the design of houses and the planning of housing estates and promotes instead the adoption of polygonal forms. This is explained using geometric analysis diagrams and references to existing housing. These concepts have been developed with reference to technical literature from various companies, with one company interested in taking it further. Providing a novel and up-to-date design concept, this book is of value to practitioners and researchers looking to improve the standard of mass housing in the UK. It is also of interest to anyone wishing to build their own house and to manufacturers wanting to move into modern housing technology. **Designing Sustainable Residential and Commercial Interiors** Lisa M.
