Masters of Tradition Margaret Rodman, Margaret Critchlow, 1987 Land copra and custom were the dominant themes in the colonial history of the New Hebrides they remain crucial concerns as the Republic of Vanuatu the name adopted at independence in 1980 is experiencing the transformation of its peasant society from small copra producers to participants in regional and world market economies Based on extensive fieldwork this book gives a detailed account of how the chain of copra works from the commodity markets of Europe to the native producers and back again Through the use of well constructed examples Rodman shows how small producers respond to changes in world prices which in turn are related to the emergence of economic differentials within Longana The islanders usually considered to be powerless in their dealings with the outside world do however see themselves as retaining and in fact do retain a measure of control over their economic activities in production and marketing as is demonstrated by Rodman The author describes how the flexibility of customary land tenure allows the system of land holding to change while appearing to remain the same Out of older kinds of inequality are emerging new kinds of inequality in cash income and in control of land land is being concentrated in a few hands while the subsequent social differentiation among the peasant copra producers is being obscured The way in which the penetration of capitalism has taken place in Vanuatu makes possible the persistence of an illusion that rich peasants are the same as traditional men of rank and influence While this is certainly an illusion it is also a real way of coping with change and slowing the impact of capitalism in a local economy with a different kind of logic

Dictionary of Critical Realism Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage

their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism **Evolution of consciousness** João Batista de Lacerda,2024-09-12 Over the course of six years I sent hundreds of messages by email and Instagram The Pope Presidents of Nations billionaires and politicians in general received the messages If I were to include these messages in the first book entitled The Man of God He Came to Change the World it would be too long Because these messages are consistent with these technologies that change every year and change our way of thinking I decided to write this second volume
