Skilled Labour Supply Imbalances:

Skilled Labour Supply Imbalances William Dodge, 1977 Report and recommendations concerning labour market imbalance in the labour supply of skilled workers in Canada discusses management attitudes and trade union attitudes toward human resources planning with particular reference to labour mobility immigration educational policy short term and medium term forecasting programmes etc Graph and statistical tables **In-Depth Productivity Review of Belgium**

OECD, 2019-07-08 Belgium has a high level of productivity However growth of productivity has declined quite strongly over the past two decades and more so than in other advanced economies This is a worrying development as fewer productivity gains mean less wage growth and a slowdown in improvements to pensions health care and well being This In Depth Productivity Review of Belgium assesses in detail the drivers of productivity and recommends a 7 Point Action Plan to reignite productivity growth in Belgium **The Political Economy of Labour Market Institutions** Gilles

Saint-Paul, 2000-09-28 According to most orthodox economists labour market rigidities are the key culprit for such high unemployment as has been observed in Europe during the past three decades But governments that have attempted to follow the standard prescription of removing rigidities have often faced harsh political opposition This book looks at why labour market institutions such as employment protection unemployment benefits and relative wage rigidities exist what role they play in society why they seem so persistent where the pressure to reform them comes from and whether reform can be politically viable or not The book ascribes a central role to the existence of underlying microeconomic frictions and to redistributive pressures between rich and poor and shows how these ingredients may give rise to labour market rents which in turn explain why a coherent set of rigidities arise as the outcome of the political process It is also shown that at the same time such rents create resistance to reform and contribute to locking society into a high unemployment rigid equilibrium Finally the basic principles exposed in the book are used to discuss various strategies for a successful labour market reform

Routledge Handbook of South Asian Economics Raghubendra Jha, 2012-05-23 The Routledge Handbook of South Asian Economics addresses the recent economic transformation in South Asia Leading experts in the field look at the major economic achievements and challenges for the region and examine why economic development across the South Asia region has diverged so significantly since the early 1990s Providing a cutting edge review of the economies of South Asia the Handbook analyzes key growth areas as well as key structural weaknesses and policy challenges facing these economies Furthermore it anticipates trends and suggests corrective measures for the South Asian economic region Sections focus on issues of human development such as inequality poverty and quality of schooling and monetary and fiscal issues particularly in light of the ongoing global financial crisis Further sections discuss issues relating to employment and infrastructure and on the experience of the region with international trade and financial flows and environmental challenges Written by renowned and respected experts on South Asian economics this Handbook will be an invaluable reference work for students and

academics as well as policy makers interested in South Asian Studies Economics and Development Studies Building America's Skilled Technical Workforce National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division of Behavioral and Social Sciences and Education, Policy and Global Affairs, Board on Science Education, Board on Higher Education and Workforce, Board on Science, Technology, and Economic Policy, Committee on the Supply Chain for Middle-Skill Jobs: Education, Training, and Certification Pathways, 2017-05-04 Skilled technical occupations defined as occupations that require a high level of knowledge in a technical domain but do not require a bachelor's degree for entry are a key component of the U.S. economy. In response to globalization and advances in science and technology, American firms are demanding workers with greater proficiency in literacy and numeracy as well as strong interpersonal, technical, and problem-solving skills. However, employer surveys and industry and government reports have raised concerns that the nation may not have an adequate supply of skilled technical workers to achieve its competitiveness and economic growth objectives. In response to the broader need for policy information and advice, *Building America's Skilled Technical Workforce* examines the coverage, effectiveness, flexibility, and coordination of the policies and various programs that prepare Americans for skilled technical jobs. This report provides action-oriented recommendations for improving the American system of technical education, training, and certification.

The economic and fiscal impact of immigration Great Britain: Home Office, 2007-10-16 This report by the Home Office, HM Treasury, the Department for Work and Pensions, and the Office for National Statistics has been produced as a cross-departmental submission to the inquiry being conducted by the House of Lords Select Committee on Economic Affairs into the economic impact of immigration in the UK. The report includes chapters on public finance and net fiscal impacts, macroeconomic impacts, labour market productivity and skills impacts, sectors and occupations, demographic impacts, the economic impact of illegal immigration, improving immigration data, and government policy on immigration. The Office for National Statistics has also produced a separate statistical submission as a background paper to this report.

Power, Norms, and Inflation Michael R. Smith, 2017-09-29 Explanations for inflation have for a long time been ceded to the purview of economists. The acceleration in rates of inflation within advanced economies during the 1960s and 1970s, however, prompted sociologists and political scientists to attempt their own accounts for this phenomenon. There are two major competing explanations of the postwar inflation. One most commonly held by economists is that inflation has been produced by governments through a combination of policy errors and cynical manipulation of policy for electoral purposes. The other, often advanced by sociologists and political scientists as an alternative, is that inflation has been an outcome of class conflict. In his study that ranges widely over the literature in the relevant disciplines, Smith examines the strengths and weaknesses of each account with particular attention to the evidence presented in support of class conflict explanations. He concludes that, on balance, the policy error/cynical manipulation explanation is better supported than its class conflict rival. The clarity with which Smith presents these rival accounts and the critical rigor of his scrutiny make this a work

of interest to advanced students in macroeconomic theory and to policy makers

OECD Economic Surveys: Thailand 2020 Economic Assessment OECD,2020-10-05 Thailand has made impressive economic and social progress over several decades However the COVID 19 crisis has interrupted this progress Thanks to its sound macroeconomic policy framework Thailand was well placed to respond rapidly to the sharp economic downturn Nevertheless achieving high income country status will require in addition to a strong recovery programme a set of policy reforms focused on productivity growth and human capital accumulation Thailand has made remarkable progress in expanding access to education and the share of highly educated workers has increased significantly Nevertheless because of skills mismatches substantial labour shortages have prevailed in a range of occupations and industries which makes it important to improve vocational education and adult training programmes As the demand for services has become important globally Thailand has an opportunity to boost its exports of services diversify its economic activity and therefore become more resilient in the face of unexpected shocks This would involve a focus on digital services and business to business services which represent a large share of the value of manufacturing products Focus on human capital skills digital technology and high value services would help Thailand resume strong economic growth and social progress after the COVID 19 crisis
