Psychoanalysis Laura Stephenson, 2023-12-14 Cinema Suffering and Psychoanalysis explores psychological disorder as common to the human condition using a unique three angled approach psychoanalysis recognises the inherent suffering encountered by each subject due to developmental phases psychology applies specific categorisation to how this suffering manifests cinema depicts suffering through a combination of video and aural elements Functioning as a culturally reflexive medium the six feature films analysed including Black Swan 2010 and The Machinist 2004 represent some of the most common psychological disorders and lived experiences of the contemporary era This book enters uncharted terrain in cinema scholarship by combining clinical psychology's Diagnostic and Statistical Manual Five DSM V to organise and diagnose each character and psychoanalysis to track the origin mechanism and affect of the psychological disorder within the

narrative trajectory of each film Lacan's theories on the infantile mirror phase the Imaginary and the Symbolic and his theories on the Real the big Other and the Event and Kristeva's theories on abjection and melancholia work in combination with the DSM's classification of symptoms to interpret six contemporary pieces of cinema By taking into consideration that origin mechanism affect and symptomatology are part of an interconnected group this book explores psychological disorder as part of the human condition something which contributes to and informs personal identity More specifically this research refutes the notion that psychological disorder and psychological health exist as a binary instead recognising that what has traditionally been pathologised may instead be viewed as variations on human identity

Thinking Through the Skin Sara Ahmed, Jackie Stacey, 2003-09-02 This exciting collection of work from leading feminist scholars including Elspeth Probyn Penelope Deutscher and Chantal Nadeau engages with and extends the growing feminist literature on lived and imagined embodiment and argues for consideration of the skin as a site where bodies take form already written upon but open to endless re inscription Individual chapters consider such issues as the significance of piercing tattooing and tanning the assault of self harm upon the skin the relation between body painting and the land among the indigenous people of Australia and the cultural economy of fur in Canada Pierced mutilated and marked mortified and glorified scarred by disease and stretched and enveloping the skin of another in pregnancy skin is seen here as both a boundary and a point of connection the place where one touches and is touched by others both the most private of experiences and the most public marker of a raced sexed and national history

Bruce Nauman Adi Louria Hayon, 2024-05-06 To date scholars explored Bruce Nauman's oeuvre through various perspectives concepts and premises including linguistics performance power and knowledge sound the political and more Amidst this vast and rich field Nauman's pieces have been regarded by critics in terms of systematic skepticism tragic skepticism skepticism of the medium and linguistic doubt This book methodically analyzes the notion of performative skepticism and its relevance to various dimensions of Bruce Nauman's post minimalist artistic practice It is argued that Nauman performs the perpetual failure of perception hence demonstrating its doubtful validity to produce certain knowledge without allowing a resolution This kind of skepticism here called performative skepticism exposes the impossibility of epistemological equipment to produce knowledge and the impossibility of attaining certainty in bridging the gap between knowledge and the real

Under the Skin Alessandra Lemma, 2010-02-25 Under the Skin considers the motivation behind why people pierce tattoo cosmetically enhance or otherwise modify their body from a psychoanalytic perspective It discusses how the therapist can understand and help individuals for whom the manipulation of the body is felt to be psychically necessary regardless of whether the process of modification causes pain In this book psychoanalyst Alessandra Lemma draws on her work in the consulting room as well as films fiction art and clinical research to suggest that the motivation for extensively modifying the surface of the body is a fundamental human desire

What Is Psychoanalysis? Barnaby B Barratt, 2013-05-20 2020 American Board Academy of Psychoanalysis ABAP's book award winner In a radically powerful interpretation of the human

condition this book redefines the discipline of psychoanalysis by examining its fundamental assumptions about the unconscious mind the nature of personal history our sexualities and the significance of the Oedipus Complex With striking originality Barratt explains the psychoanalytic way of exploring our inner realities and criticizes many of the schools of psychoanalytic psychotherapy that emerged and prospered during the 20th century In 1912 Sigmund Freud formed a Secret Committee charged with the task of protecting and advancing his discoveries In this book Barratt argues both that this was a major mistake making the discipline more like a religious organization than a science and that this continues to infuse psychoanalytic institutes today What is Psychoanalysis takes each of the four fundamental concepts that Freud himself said were the cornerstones of his science of healing and offers a fresh and detailed re examination of their contemporary importance Barratt s analysis demonstrates how the profound work as well as the playfulness of psychoanalysis provides us with a critique of the ideologies that support oppression and exploitation on the social level It will be of interest to advanced students of clinical psychology or philosophy as well as psychoanalysts and psychotherapists Radical Psychoanalysis Barnaby B. Barratt, 2016-05-20 2020 American Board Academy of Psychoanalysis ABAPsa book award winner Only by the method of free association could Sigmund Freud have demonstrated how human consciousness is formed by the repression of thoughts and feelings that we consider dangerous Yet today most therapists ignore this truth about our psychic life This book offers a critique of the many brands of contemporary psychoanalysis and psychotherapy that have forgotten Freud s revolutionary discovery Barnaby B Barratt offers a fresh and compelling vision of the structure and function of the human psyche building on the pioneering work of theorists such as Andr Green and Jean Laplanche as well as contemporary deconstruction feminism and liberation philosophy He explores how drive or desire operates dynamically between our biological body and our mental representations of ourselves of others and of the world we inhabit This dynamic vision not only demonstrates how the only authentic freedom from our internal imprisonments comes through free associative praxis it also shows the extent to which other models of psychoanalysis such as ego psychology object relations self psychology and interpersonal relations tend to stray disastrously from Freud s original and revolutionary insights This is a vision that understands the central issues that imprison our psychic lives the way in which the reflections of consciousness are based on the repression of our innermost desires the way in which our erotic vitality is so often repudiated and the way in which our socialization oppressively stifles our human spirit Radical Psychoanalysis restores to the discipline of psychoanalysis the revolutionary impetus that has so often been lost It will be essential reading for psychoanalysts psychoanalytic psychotherapists mental health practitioners and students and academics with an interest in the history of psychoanalysis

Architecture and the Mimetic Self Lucy Huskinson, 2018-02-02 Buildings shape our identity and sense of self in profound ways that are not always evident to architects and town planners or even to those who think they are intimately familiar with the buildings they inhabit Architecture and the Mimetic Self provides a useful theoretical guide to our

unconscious behaviour in relation to buildings and explains both how and why we are drawn to specific elements and features of architectural design. It reveals how even the most uninspiring of buildings can be modified to meet our unconscious expectations and requirements of them and by the same token it explores the repercussions for our wellbeing when buildings fail to do so. Criteria for effective architectural design have for a long time been grounded in utilitarian and aesthetic principles of function, efficiency, cost and visual impact. Although these are important considerations, they often fail to meet the fundamental needs of those who inhabit and use buildings. Misconceptions are rife, not least because our responses to architecture are often difficult to measure and are in large part unconscious. By bridging psychoanalytic thought and architectural theory, *Architecture and the Mimetic Self* frees the former from its preoccupations with interpersonal human relations to address the vital relationships that we establish with our nonhuman environments. In addition to providing a guide to the unconscious behaviours that are most relevant for evaluating architectural design, this book explains how our relationships with the built environment inform a more expansive and useful psychoanalytic theory of human relationship and identity. It will appeal to psychoanalysts and analytical psychologists, architects and all who are interested in the overlaps of psychology, architecture and the built environment.

Psychoanalysis in the Technoculture Era Alessandra Lemma, Luigi Caparrotta, 2013-07-18
 Alessandra Lemma, Winner of the Levy Goldfarb Award for Child Psychoanalysis. By now, the internet and other forms of virtual communication have been in place for at least twenty years. However, surprisingly little has been written about the use of new technologies in the psychoanalytical literature. As such, *Psychoanalysis in the Technoculture Era* is a timely exposition on the subject of both virtual and analytic space. Bringing together the work of several psychoanalysts, the Editors Alessandra Lemma and Luigi Caparrotta illustrate how new technologies have become an integral part of our everyday lives and how they have silently and subtly permeated the psychoanalytic setting. The contributors explore how new technologies have affected psychoanalytic practice and discuss the advantages and disadvantages of its use. *Psychoanalysis in the Technoculture Era* unravels some of the meanings of virtual world terms and opens this field to greater scrutiny, stimulating and promoting discussion about new technologies in psychoanalytic practice. This book will be of interest to the psychoanalytic community, including psychotherapy professionals, psychoanalysts, post graduate, graduate and undergraduate students.

From Dualism to Oneness in Psychoanalysis Yorai Sella, 2018-01-19
From Dualism to Oneness in Psychoanalysis: A Zen Perspective on the Mind-Body Question focuses on the shift in psychoanalytic thought from a view of mind-body dualism to a contemporary non-dualistic perspective. Exploring this paradigm shift, Yorai Sella examines the impact of the work of psychoanalysts and researchers such as Winnicott, Bion, Daniel Stern and Kohut, and delineates the contributions of three major schools of psychoanalytic thought in which the non-dualistic view is exemplified: 1. intersubjective, 2. neuro-psychoanalytic and 3. mystically inclined psychoanalysis. Reaching beyond the constraints of dualism, Sella delineates the interdisciplinary approaches leading to psychoanalysis's paradigm shift. Focusing on the unique contribution of Zen

Buddhism the book draws on Ehei D gen s philosophy to substantiate the non duality of subject and object body and mind ultimately leading from alienation and duality to what Bion has termed at one ment The way in which psychoanalytic theory and practice may develop further along these lines is demonstrated throughout the book in a variety of clinical vignettes This book will inform the practice of all psychoanalysts mental health professionals psychotherapists and clinicians interested in mind body issues in psychotherapy in the philosophy of psychoanalysis and in East West dialogue
