Ethical Consumption Tania Lewis, Emily Potter, 2013-01-11 A not so quiet revolution seems to be occurring in wealthy capitalist societies supermarkets selling guilt free Fairtrade products lifestyle TV gurus exhorting us to eat less buy local and go green neighbourhood action groups bent on swopping not shopping And this is happening not at the margins of society but at its heart in the shopping centres and homes of ordinary people Today we are seeing a mainstreaming of ethical concerns around consumption that reflects an increasing anxiety with and accompanying sense of responsibility for the risks and excesses of contemporary lifestyles in the global north This collection of essays provides a range of critical tools for understanding the turn towards responsible or conscience consumption and in the process interrogates the notion that we can shop our way to a more ethical sustainable future Written by leading international scholars from a variety of disciplinary backgrounds and drawing upon examples from across the globe *Ethical Consumption* makes a major contribution to the still fledgling field of ethical consumption studies This collection is a must read for anyone interested in the relationship between consumer culture and contemporary social life

Critical Feminist Approaches to Eating Dis/Orders Helen Malson, Maree Burns, 2009-06-02 Over the past decade there have been significant shifts both in feminist approaches to the field of eating disorders and in the ways in which gender bodies body weight body management and food are understood represented and regulated within the dominant cultural milieus of the early twenty first century *Critical Feminist Approaches to Eating Dis Orders* addresses these developments exploring how eating disordered subjectivities experiences and body management practices are theorised and researched within postmodern and post structuralist feminist frameworks Bringing together an international range of cutting edge contemporary feminist research and theory on eating disorders this book explores how anorexia nervosa bulimia nervosa and obesity cannot be adequately understood in terms of individual mental illness and deviation from the norm but are instead continuous with the dominant cultural ideas and values of contemporary cultures This book will be essential reading for academic graduate and post graduate researchers with an interest in eating disorders and critical feminist scholarship across a range of disciplines including psychology sociology cultural studies and gender studies as well as clinicians interested in exploring innovative theory and practice in this field
