Congress. Senate. Committee on Aeronautical and Space Sciences, 1962 [Real Dreams: Thirty Years of Short Stories](#)

M.G. Edwards, 2011-11-15 *Real Dreams Thirty Years of Short Stories* is a collection of 15 short stories written between 1981 and 2011 The stories are from multiple genres with some common themes including hope dreams light darkness perseverance and spirituality wrapped up in some novel ideas Enjoy these diverse and timeless works three decades in the making **Astronaut Selection and Training** ,1993 *The Last Men to Walk on the Moon* Brinkley Howard, *Historycaps*, 2016-05-18 By Apollo 17 the space race was over and the fascination with the Apollo mission was not as great Though the mission is not the most covered mission it is one of the most important what its experiments proved paved the way for space missions to come [Marketing the Moon](#) David Meerman Scott, Richard Jurek, 2014-02-28 One of the most successful public relations campaigns in history featuring heroic astronauts press savvy rocket scientists enthusiastic reporters deep pocketed defense contractors and Tang In July 1969 ninety four percent of American televisions were tuned to

coverage of Apollo 11's mission to the moon. How did space exploration, once the purview of rocket scientists, reach a larger audience than *My Three Sons*? Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience? In *Marketing the Moon*, David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history: the selling of the Apollo program. Primed by science fiction magazine articles and appearances by Wernher von Braun on the *Tomorrowland* segments of the Disneyland prime time television show, Americans were a receptive audience for NASA's pioneering brand journalism. Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel through press releases, bylined articles, lavishly detailed background materials, and fully produced radio and television features rather than push an agenda. American astronauts who signed exclusive agreements with *Life* magazine became the heroic and patriotic faces of the program. And there was some judicious product placement: Hasselblad was the first camera on the moon; Sony cassette recorders and supplies of Tang were on board the capsule; and astronauts were equipped with the Exer Genie personal exerciser. Everyone wanted a place on the bandwagon. Generously illustrated with vintage photographs, artwork, and advertisements many never published before, *Marketing the Moon* shows that when Neil Armstrong took that giant leap for mankind, it was a triumph not just for American engineering and rocketry but for American marketing and public relations.

The NIH Record, 2000 **Inventing the American Astronaut** Matthew H. Hersch, 2012-10-08 Who were the men who led America's first expeditions into space? Soldiers. Daredevils. The public sometimes imagined them that way: heroic military men and hot shot pilots without the capacity for doubt, fear, or worry. However, early astronauts were hard working and determined professionals, organization men who were calm, calculating, and highly attuned to the politics and celebrity of the Space Race. Many would have been at home in corporate America, and until the first rockets carried humans into space, some seemed to be headed there. Instead, they strapped themselves to missiles and blasted skyward, returning with a smile and an inspiring word for the press. From the early days of Project Mercury to the last moon landing, this lively history demystifies the American astronaut while revealing the warring personalities, raw ambition, and complex motives of the men who were the public face of the space program.
