guide dedicated to waxwings or kingfishers would need nothing more than a sketch and a single sentence to satisfactorily identify its subject Sparrows are harder to pin down This book covers one family Passerellidae which includes towhees and juncos and 76 members of the sparrow clan Birds have a human history too beginning with their significance to native cultures and continuing through their discovery by science their taxonomic fortunes and misfortunes and their prospects for survival in a world with ever less space for wild creatures This book includes not just facts and measurements but stories of how birds got their names and how they were discovered of their entanglement with human history Golden-winged Warbler Ecology, Conservation, and Habitat Management Henry M. Streby, David E. Andersen, David Buehler, 2016-10-26

Golden winged Warblers *Vermivora chrysoptera* are migratory songbirds that breed in temperate North America primarily in the Great Lakes region with remnant populations throughout the Appalachian Mountains and winter in Central and northern South America Their breeding range has contracted dramatically in the Appalachian Mountains and many populations have dramatically declined likely due to habitat loss competition and interbreeding with Blue winged Warblers *Vermivora pinus* and global climate change As a result of population declines in much of the eastern portion of their breeding range Golden winged Warblers are listed as endangered or threatened in 10 U S states and in Canada and have been petitioned for protection under the U S Endangered Species Act Published in collaboration with and on behalf of The American Ornithological Society this volume in the highly regarded Studies in Avian Biology series compiles extensive current research on Golden winged Warblers and summarizes what is known and identifies many remaining unknowns providing a wealth of peer reviewed science on which future research and listing decisions can be based **Raptors of New Mexico** Jean-Luc E. Cartron, 2010-08-16

No book has ever before specifically focused on the birds of prey of New Mexico Both Florence Bailey 1928 and J Stokley Ligon 1961 published volumes on the birds of New Mexico but their coverage of raptors was somewhat limited In the ensuing years a great deal of new information has been collected on these mighty hunters distribution ecology and conservation including in New Mexico The book begins with a history of the word raptor The order of Raptatores or Raptores was first used to classify birds of prey in the early nineteenth century derived from the Latin word raptor one who seizes by force The text then includes the writings of thirty seven contributing authors who relate their observations on these regal species For example Joe Truett recounts the following in the chapter on the Swainson s Hawk From spring to fall each year at the Jornada Caves in the Jornada del Muerto Swainson s hawks assemble daily to catch bats The bats exit the caves actually lava tubes near sundown The hawks swoop in snatch bats from the air and eat them on the wing Originally from France Jean Luc Cartron has lived and worked on several continents finding his passion in the wide open spaces of New Mexico He became fascinated by the birds of prey and has studied their ecology and conservation for nearly twenty years **Raptors of New Mexico** will provide readers with a comprehensive treatment of all hawks eagles kites vultures falcons and owls breeding or wintering in New Mexico or simply migrating through the state This landmark study is also beautifully

illustrated with more than six hundred photographs including the work of more than one hundred photographers and more than twenty species distribution maps
