The Autonomous House B. Vale,R. Vale,1975 The Autonomous House Brenda Vale,Robert James Dennis Vale,1977-12-01 **Autonomous house; design and planning for self-sufficiency** B. Vale,1975 **The New Autonomous House** Brenda Vale,Robert Vale,2002 I ve seen many books on this subject but none so well documented and honest Whole Earth Proceedings of the 2nd International Civil Engineering and Architecture Conference Marco Casini,2022-07-12 This book collects the scientific proceedings presented during the 2022 The 2nd International Civil Engineering and Architecture Conference held in Singapore in March 2022 with the aim of showing the latest advancements in theoretical and applied research in the architecture engineering and construction sector AEC The book is organized into 4 main parts namely 1 Sustainable Urban Planning and Architecture 2 Architectural and Environmental Design 3 Built Environment Materials and Construction Technology and 4 Civil Engineering and Construction Management The goal of the book is to provide readers with an overview of the ongoing transformation of the AEC industry presenting a thorough investigation of the emerging trends in the fields of green building design construction and operation *The New Autonomous House* Brenda Vale,2000 **The Self-sufficient House** Frank Coffee,1981 **The Zero-Carbon House** Martin Godfrey Cook,2011-09-16 Zero Carbon is an abstract concept for most people but we have lived energy profligate lifestyles for too long on finite fossil fuel resources We now face potential environmental catastrophe from climate change and global warming with a continuing exponentially expanding global population that doubles every four decades The capacity of the planet to reabsorb carbon dioxide is about two to three tonnes of carbon equivalent per person at current population levels of seven billion and therefore there is a desperate need for us to reduce our carbon footprint A way of helping to achieve this is to live in a zero carbon house and this will become UK legislation for new homes by 2016 This fascinating book covers all aspects of the zero carbon house from its evolution to achieving carbon neutrality in old and new homes as well as entire communities Includes an overview of zero carbon and how to achieve it on a global scale covers communities of zero carbon houses and provides inspirational examples of low carbon lifestyles Case studies show how principles are put into successful practice to save energy carbon money and the environment *From Bauhaus to Ecohouse* Peder Anker,2010 Debates about environmentally sensitive architecture have been ongoing for nearly a century From Bauhaus to Eco House examines key moments of inspiration and exchange between designers and ecologists from the Bauhaus projects of the interwar period to the eco arks of the late 1980s From Bauhaus to Eco House provides new insight into a critical period in the evolution of environmental awareness and design **The Whole Building Handbook** Varis Bokalders,Maria Block,2010-02-09 The Whole Building Handbook is a compendium of all the issues and strategies that architects need to understand to design and construct sustainable buildings for a sustainable society The authors move beyond the current definition of sustainability in architecture which tends to focus on energy efficiency to include guidance

for architecture that promotes social cohesion personal health renewable energy sources water and waste recycling systems permaculture energy conservation and crucially buildings in relation to their place The authors offer a holistic approach to sustainable architecture and authoritative technical advice on How to design and construct healthy buildings through choosing suitable materials healthy service systems and designing a healthy and comfortable indoor climate including solutions for avoiding problems with moisture radon and noise as well as how to facilitate cleaning and maintenance How to design and construct buildings that use resources efficiently where heating and cooling needs and electricity use is minimized and water saving technologies and garbage recycling technologies are used How to close organic waste sewage heat and energy cycles For example how to design a sewage system that recycles nutrients Includes a section on adaptation of buildings to local conditions looking at how a site must be studied with respect to nature climate and community structure as well as human activities The result is a comprehensive thoroughly illustrated and carefully structured textbook and reference
