The Computer Based Patient Record An Essential Technology For He:

The Computer-based Patient Record Institute of Medicine (U.S.). Committee on Improving the Patient Record, Richard S. Dick, Elaine B. Steen, 1991 Produced by the Institute of Medicine this volume presents a blueprint for introducing the computer based patient record CPR nationwide within the next decade An expert panel explores the potential of the machine readable CPR to improve diagnostic and care decisions and provide a database for po *The Computer-Based Patient Record* Institute of Medicine, Committee on Improving the Patient Record, 1997-10-14 Most industries have plunged into data automation but health care organizations have lagged in moving patients medical records from paper to computers In its first edition this book presented a blueprint for introducing the computer based patient record CPR The revised edition adds new information to the original book One section describes recent developments including the creation of a computer based patient record institute An international chapter highlights what is new in this still emerging technology An expert committee explores the potential of machine readable CPRs to improve diagnostic and care decisions provide a database for policymaking and much more addressing these key questions Who uses patient records What technology is available and what further research is necessary to meet users needs What should government medical organizations and others do to make the transition to CPRs The volume also explores such issues as privacy and confidentiality costs the need for training legal barriers to CPRs and other key topics *Aspects of the Computer-based Patient Record* Harold P. Lehmann, Patricia A. Abbott, Nancy K. Roderer, Adam Rothschild, Steven Mandell, Jorge Ferrer, Robert E. Miller, Marion J. Ball, 2013-06-29 One of the hottest political issues today concerns ways to improve national healthcare systems without incurring further costs An extensive study by the Institute of Medicine IOM in the United States formally reported that computer based patient records are absolutely necessary to help contain the cost explosion in health care The information obtained from experts the studies conducted and the conclusions that went into the IOM s report have now been collected in *Aspects of the Computer Based Patient Record* A large portion of the volume discusses the state of the art in existing computer based systems as well as the essential needs which must be addressed by future computer based patients records A final section in the book discusses implementation strategies for changing to the electronic system and practical issues Who will bear the final cost How and when will healthcare providers who use the system be trained This volume contains the concise valuable information which hospital administrators hospital systems designers third party payer groups and medical technology providers will need if they hope to successfully transit to hospital systems which use a computer based patient record **Making Government Work**, 1994-02 Assesses the use of computer and telecommunications technologies in the electronic delivery of governmental services Photos charts and tables *Human and Organizational Dynamics in E-Health* David Bangert, Robert Doktor, 2020-01-30 Nurses are key to building effective teams in primary care but it has proved difficult to develop teams in a service based on a small business model Current organisational arrangements fragment the different clinical professionals

into tribes who have different employers and managers This book brings together the work of pioneers in the field to provide models for the future As the need to define the primary care team becomes more urgent this book is essential reading for all nursing professionals in primary care nursing management general practitioners and primary care leaders at health authorities and Primary Care Organisations The authors present an understanding of the context within which change is taking place the elements to be addressed in the change process and a challenge for the future direction and pace of change From the Foreword by Marion Bull Chief Nursing Officer Welsh Office **The Fair Health Information Practices Act of 1994** United States. Distracted Doctoring Peter J. Papadakos,Stephen Bertman,2017-07-31 Examining room computers require doctors to record detailed data about their patients yet reduce the time clinicians can spend listening attentively to the very people they are trying to help This book presents original essays by distinguished experts in their fields addressing this critical problem and making an urgent case for reform because while electronic technology has revolutionized the practice of medicine it also poses a unique challenge to health care Smartphones in the hands of doctors and nurses have become dangerously seductive devices that can endanger their patients Distracted Doctoring is written for anesthesiologists and surgeons as well as general practitioners nurses and health care administrators and students Chapters include Electronic Challenges to Patient Safety and Care Distraction Disengagement and the Purpose of Medicine and Managing Distractions through Advocacy Education and Change **EHealth: Combining Health Telematics, Telemedicine, Biomedical Engineering and Bioinformatics to the Edge** B. Collen, Marion J. Ball, 2015-10-08 This is a meticulously detailed chronological record of significant events in the history of medical informatics and their impact on direct patient care and clinical research offering a representative sampling of published contributions to the field The History of Medical Informatics in the United States has been restructured within this new edition reflecting the transformation medical informatics has undergone in the years since 1990 The systems that were once exclusively institutionally driven hospital multihospital and outpatient information systems are today joined by systems that are driven by clinical subspecialties nursing pathology clinical laboratory pharmacy imaging and more At the core is the person not the clinician not the institution whose health all these systems are designed to serve A group of world renowned authors have joined forces with Dr Marion Ball to bring Dr Collen s incredible work to press These recognized leaders in medical informatics many of whom are recipients of the Morris F Collen Award in Medical Informatics and were friends of or mentored by Dr Collen carefully reviewed editing and updating his draft chapters This has resulted in the most thorough history of the subject imaginable and also provides readers with a roadmap for the subject well into later in the century

The Digitalization of Healthcare Ian P. McLoughlin, Karin Garrety, Rob Wilson, 2017-01-19 Electronic health records are widely regarded as the connective tissue of any modern healthcare system For some they represent a dangerous enthusiasm and for others a key enabler of disruptive innovation Many governments have made major policy and financial investments in digitalizing health records but their implementation has frequently run into opposition from doctors had lukewarm responses from patients and raised considerable concerns for privacy advocates and others worried by the security of sensitive health data and the risks of national data bases This book draws upon the concept of orders of worth to reveal the moral dimensions of the medical division of labour and to delve deeper into understanding why electronic records have been so difficult to implement and the sources of opposition to them The authors argue that digitalization disrupts the moral orders which define rights and responsibilities for the sharing and exchanging of patient medical data This is illustrated through longitudinal studies of two of the most controversial attempts to introduce national systems a patient controlled electronic record in Australia and a national summary care record that was part of the ill fated NHS national program for IT in England The authors conclude by using the lessons from these national experiences and insights from two regional projects in each country to suggest how the idea of electronic records might be re thought It is a must read for anyone concerned about health information and the implications of how it is shared and exchanged in a digital world **Building a Better Delivery System** Institute of Medicine, National Academy of Engineering, 2005-10-20 In a joint effort between the National Academy of Engineering and the Institute of Medicine this books attempts to bridge the knowledge awareness

divide separating health care professionals from their potential partners in systems engineering and related disciplines The goal of this partnership is to transform the U S health care sector from an underperforming conglomerate of independent entities individual practitioners small group practices clinics hospitals pharmacies community health centers et al into a high performance system in which every participating unit recognizes its dependence and influence on every other unit By providing both a framework and action plan for a systems approach to health care delivery based on a partnership between engineers and health care professionals Building a Better Delivery System describes opportunities and challenges to harness the power of systems engineering tools information technologies and complementary knowledge in social sciences cognitive sciences and business management to advance the U S health care system **Health Reform, Health Records,**
