The Conglomerate Corporation An Antitrust Law And Economics Symposium

Candace Howes,Ajit Singh

The Conglomerate Corporation An Antitrust Law And Economics Symposium:

The Conglomerate Corporation University of Florida. Public Policy Research Center, University of Florida. College of Law, 1981 **Antitrust Law Journal** , 1986 Competitiveness Matters Candace Howes, Ajit Singh, 2010-08-27 This book argues against the current view that competitiveness that is the competitiveness of the manufacturing sector matters to the long term health of the U S economy and particularly to its long term capacity to raise the standard of living of its citizens The book challenges the arguments popularized most recently by Paul Krugman that competitiveness is a dangerous obsession that distracts us from the question most central to solving the problem of stagnant real income growth namely what causes productivity growth especially in the service sector The central argument is that if the U S economy is to achieve full employment with rising real wages it is necessary to enhance the competitiveness of its tradable goods sector The book shows that current account deficits cannot be explained by macroeconomic mismanagement but are rather the consequence of an uncompetitive manufacturing sector It finds that the long term health of the manufacturing sector requires not only across the board policies to remedy problems of low or inefficient investment but also sectoral policies to address problems that are strategic to resolving the balance of payments problems Lessons are drawn from the experience of some European and Asian countries This book will be of interest to economists political scientists and business researchers concerned with the place of the manufacturing sector in overall health of the U S economy with issues of industrial policy and industrial restructuring and with the conditions for rising standards of living Candace Howes is Associate Professor Barbara Hogate Ferrin Chair Connecticut College Ajit Singh is Professor of Economics Queens College Cambridge **An Agenda for Economic Reform in Korea** Kenneth Judd, Young-Ki Lee, 2013-11-01 An Agenda for Economic Reform in Korea looks at Korea s economic problems from the perspective of the American experience with economic reforms and sheds new light on the problems of economic reform facing nations all over the world The authors examine such issues as corporate governance social welfare labor relations and other pressing challenges and suggest a new vision for the Korean economy

Agricultural Cooperatives Glynn McBride, 2012-12-06 The genesis of this book dates back a number of years to an annual meeting of the American Institute of Cooperation Cooperative leaders at that meeting openly expressed their feelings that they would like a much stronger commitment on the part of our land grant universities in particular and other educational institutions in general to creating a greater understanding of cooperatives and their role in our economy Since I was in agreement with this position the course in general group action which I was teaching was changed to emphasize the role of agricultural cooperatives The need for a textbook designed to help in this emphasis became apparent This book is the culmination of an effort to meet that need This book has been prepared with the student and instructor in mind It is based upon experience gained from many years of interaction with students in a classroom setting in discussions with them after class hours and after they had finished their degree requirements and had taken positions in industry government or

elsewhere While objectives of the book have remained relatively unchanged over time the substance and format as means of meeting those objectives have changed from time to time as a result of these contacts and discussions The input of students over the years as reflected in this product is gratefully acknowledged

EU Competition Law and the Information and Communication Technology Network Industries Andrej Fatur,2012-03-08

Competition policies have long been based on a scholarly tradition focused on static models and static analysis of industrial organisation However recent developments in industrial organisation literature have led to significant advances moving beyond traditional static models and a preoccupation with price competition to consider the organisation of industries in a dynamic context This is especially important in the field of information and communication technology ICT network industries where competition centres on network effects innovation and intellectual property rights and where the key driver of consumer benefit is technological progress Consequently when an antitrust intervention is contemplated a number of considerations that arise out of the specific nature of the ICT sector have to be taken into account to ensure improved consumer welfare This book considers the adequacy of existing EU competition policy in the area of the ICT industries in the light of the findings of modern economic theory Particular attention is given to the implications of these dynamic markets for the competitive assessment and treatment of the most common competitive harms in this area such as non price predatory practices tying and bundling co operative standard setting platform joint ventures and co operative R D

Investigation of Conglomerate Corporations, a Report by the Staff of the Antitrust Subcommittee of ... , June 1, 1971 United States. Congress. House. Committee on the Judiciary,1971

The Economists' Hour Binyamin Appelbaum,2019-09-03 In this lively and entertaining history of ideas Liaquat Ahamed The New Yorker New York Times editorial writer Binyamin Appelbaum tells the story of the people who sparked four decades of economic revolution Before the 1960s American politicians had never paid much attention to economists But as the post World War II boom began to sputter economists

gained influence and power In *The Economists Hour* Binyamin Appelbaum traces the rise of the economists first in the United States and then around the globe as their ideas reshaped the modern world curbing government unleashing corporations and hastening globalization Some leading figures are relatively well known such as Milton Friedman the elfin libertarian who had a greater influence on American life than any other economist of his generation and Arthur Laffer who sketched a curve on a cocktail napkin that helped to make tax cuts a staple of conservative economic policy Others stayed out of the limelight but left a lasting impact on modern life Walter Oi a blind economist who dictated to his wife and assistants some of the calculations that persuaded President Nixon to end military conscription Alfred Kahn who deregulated air travel and rejoiced in the crowded cabins on commercial flights as the proof of his success and Thomas Schelling who put a dollar value on human life Their fundamental belief That government should stop trying to manage the economy Their guiding principle That markets would deliver steady growth and ensure that all Americans shared in the benefits But the *Economists Hour* failed to deliver on its promise of broad prosperity And the single minded embrace of markets has come at the expense of economic equality the health of liberal democracy and future generations Timely engaging and expertly researched *The Economists Hour* is a reckoning and a call for people to rewrite the rules of the market A Wall Street Journal Business Bestseller Winner of the Porchlight Business Book Award in Narrative Biography **Mergers and Economic Efficiency** ,1981 *Mergers and Economic Efficiency: Industrial concentration, mergers, and growth* ,1980 *Cases in European Competition Policy* Bruce Lyons,2009-08-27 Competition between firms is usually the most effective way of delivering economic efficiency and what consumers want However there is a balance to be struck Firms must not be over regulated and so hampered in their development of innovative products and new strategies to compete for customers Nor must they be completely free to satisfy a natural preference for monopoly which would give them higher profits and a quieter life The economic role of competition policy control of anticompetitive agreements mergers and abusive practices is to maintain this balance and an effective policy requires a nuanced understanding of the economics of industrial organization *Cases in European Competition Policy* demonstrates how economics is used and sometimes abused in competition cases in practical competition policy across Europe Each chapter summarizes a real case investigated by the European Commission or a national authority and provides a critique of key aspects of the economic analysis

Decoding **The Conglomerate Corporation An Antitrust Law And Economics Symposium**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring.
