The Construing Person:

International Handbook of Personal Construct Psychology Fay Fransella, 2003-09-12 Personal Construct Psychology PCP was devised by George Kelly in 1955 as a new method in psychotherapy. Since then his techniques have been applied widely throughout psychology and beyond to include areas as diverse as nursing, conflict resolution, sociology, and literary criticism. This handbook brings together for the first time a wide range of theories, research, and practice that have grown out of Kelly's original concept. It provides a reference on what has been done and insights into how further applications can be made within psychology and psychotherapy and also informs non-psychologists and those unfamiliar with Kelly's techniques of its usefulness and applicability in other disciplines. This is the only comprehensive reference on PCP available. Kelly's work is seminal and widely known. Emphasises practical application to a wide range of disciplines. *The Construction of Commercial Contracts* JW Carter, 2013-01-04 This book adopts a principled approach to the law applied in the construction of commercial contracts. This approach is presented as part of a coherent theory of the law of contract construction which makes a unique contribution to scholarship and understanding of the most important aspect of the practice of commercial lawyers. The law is explained by reference to three stages in construction. It distinguishes the preliminary stage in which context is established from the meaning and application stages of contract construction. The approach provides insights both into the practical problems that lawyers face in particular in relation to admissibility of extrinsic evidence and the theoretical underpinnings of the subject. The book also explains the relationship between intention and construction and discusses general and specific rules that determine the results of construction disputes. Each chapter is introduced by statements of its objectives and the book includes simple definitions of key concepts as well as summaries of the complex principles which comprise the law of construction. In illustrating construction principles and their application, the exposition of the law draws on the author's knowledge of Australian contract law and the influence and role of the UNIDROIT principles, CISG, and the American Restatement Second Contracts. *Reflections in Personal Construct Theory* Richard Butler, 2009-03-18 Internationally renowned practitioners discuss the impact of reflexivity on their work, giving those new to personal construct psychology valuable insights and guidance on managing the therapeutic relationship. Reflexivity is a key methodological issue in psychological theory and practice and is an area of growing interest. International contributors include prominent constructivist psychologists such as Richard Bell and David Winter. Will help constructivist therapists to gain a better understanding of the nature of personal constructs from the perspective of both client and therapist. *Handbook of Research on Contemporary Theoretical Models in Information Systems* Dwivedi, Yogesh K., Lal, Banita, Williams, Michael D., Schneberger, Scott L., Wade, Michael, 2009-05-31 This book provides a comprehensive understanding and coverage of the various theories, models, and related research approaches used within IS research.
