The Contest Of Meaning Critical Histories Of Photography:

The Contest of Meaning Richard Bolton, 1992-02-25 Photography's great success gives the impression that the major questions that have haunted the medium are now resolved. On the contrary, the most important questions about photography are just beginning to be asked. These fourteen essays with over 200 illustrations critically examine prevailing beliefs about the medium and suggest new ways to explain the history of photography. They are organized around the questions: What are the social consequences of aesthetic practice? How does photography construct sexual difference? How is photography used to promote class and national interests? What are the politics of photographic truth? The *Contest of Meaning* summarizes the challenges to traditional photographic history that have developed in the last decade out of a consciously political critique of photographic production. Contributions by a wide range of important American critics reexamine the complex and often contradictory roles of photography within society. Douglas Crimp, Christopher Phillips, Benjamin Buchloh, and Abigail Solomon Godeau examine the gradually developed exclusivity of art photography and describe the politics of canon formation throughout modernism. Catherine Lord, Deborah Bright, Sally Stein, and Jan Zita Grover examine the ways in which the female is configured as a subject and explain how sexual difference is constructed across various registers of photographic representation. Carol Squiers, Esther Parada, and Richard Bolton clarify the ways in which photography serves as a form of mass communication, demonstrating in particular how photographic production is affected by the interests of the powerful patrons of communications. The three concluding essays by Rosalind Krauss, Martha Rosler, and Allan Sekula critically examine the concept of photographic truth by exploring the intentions informing various uses of objective images within society.

Photographs Objects Histories Elizabeth Edwards,Janice Hart,2004-06-01 This innovative volume explores the idea that while photographs are images they are also objects and this materiality is integral to their meaning and use The case studies presented focus on photographs active in different institutional political religious and domestic spheres where physical properties the nature of their use and the cultural formations in which they function make their objectness central to how we should understand them The book s contributions are drawn from disciplines including the history of photography visual anthropology and art history with case studies from a range of countries such as the Netherlands North America Australia Japan Romania and Tibet Each shows the methodological strategies they have developed in order to fully exploit the idea of the materiality of photographic images

Photography and the Arts Juliet Hacking,Joanne Lukitsh,2020-10-29

Photography both in the form of contemporary practice and that of historical material now occupies a significant place in the citadels of Western art culture It has an institutional network of its own embedded within the broader art world with its own specialists including academics critics curators collectors dealers and conservators All of this cultural activity consolidates an artistic practice and critical discourse of photography that distinguishes what is increasingly termed art photography from its commercial scientific and amateur guises But this long awaited recognition of photography as high art brings new challenges How will photography s newly privileged place in the art world affect how the history of creative photography is written

Modernist claims for the medium as having an aesthetic often turned on precedents from painting Postmodernism challenged a cultural hierarchy organized around painting Nineteenth century photographs move between the symbolic spaces of the gallery wall and the archive de contextualised for art and re contextualised for history But what of the contemporary writings images and practices that negotiated an aesthetic status for the photographic Photography and the Arts revisits practices both celebrated and elided by the modernist and postmodernist grand narratives of art and photographic history in order to open up new critical spaces Written by leading scholars in the fields of photography art and literature the essays examine the metaphorical as well as the material exchanges between photography and the fine graphic reproductive and sculptural arts

Class and News Don Heider, 2004 News as a cultural product has earned a place in scholarly research over the past several decades and media scholars and sociologists have successfully looked at news for ideological content and how news may shape an audience's ideas on politics gender and race But how does news influence an audience's ideas about social structure Class and News is a multidisciplinary collection of essays examining how the news media treats or neglects this structure in everyday reporting Are certain stories chosen for their appeal to the upper or middle classes Are stories of interest to lower class readers viewers avoided How are issues of social order reported or reflected in stories that aren't about class This in depth work will be a valuable resource for students scholars and general readers interested in the dynamics of class and news in the United States

Women's Albums and Photography in Victorian England Patrizia Di Bello,2017-07-05 This beautifully illustrated study recaptures the rich history of women photographers and image collectors in nineteenth century England Situating the practice of collecting exchanging and displaying photographs and other images in the context of feminine sociability Patrizia Di Bello shows that albums express Victorian women s experience of modernity The albums of individual women and the broader feminine culture of collecting and displaying images are examined uncovering the cross references and fertilizations between women s albums and illustrated periodicals and demonstrating the way albums and photography itself were represented in women s magazines fashion plates and popular novels Bringing a sophisticated eye to overlooked images such as the family photograph Di Bello not only illustrates their significance as historical documents but elucidates the visual rhetorics at play In doing so she identifies the connections between Victorian album making and the work of modern day amateurs and artists who use digital techniques to compile and decorate albums with Victorian style borders and patterns At a time when photographic album making is being re vitalised by digital technologies this book rewrites the history of photographic albums placing the female collector at its centre and offering an alternative history of photography focused on its uses rather than on its aesthetic or artistic considerations It is remarkable in elegantly connecting the history of photography with the fields of material culture and women s studies
