The Practice Of Performance Studies In Musical Interpretation:

The Practice of Performance John Rink, 1995-12-07 The twelve essays in this volume reflect the most important trends in the study of musical performance Three areas are investigated the psychology of performance the semantics of performance and the relation between performance and analysis The first section broaches fundamental issues such as text expression musical motion and the role of practice in the acquisition of expertise The next four chapters address the shaping of structure and the projection of meaning in performance while the last four consider performance as analytical paradigm as dramatic narrative as act of criticism as temporal process Among the distinguished international authorship are many accomplished performers whose practical experience ensures that the book contains vital and stimulating insights into the interpretation of music and that it will speak to a wide musical audience

A Topical Guide to Schenkerian Literature David Carson Berry, 2004 To the growing list of Pendragon Press publications devoted to the work of Heinrich Schenker we wish to announce the addition of this much needed bibliography The author a student of Allen Forte has created a work useful to a wide range of researchers music theorists musicologists music librarians and teachers The Guide is the largest Schenkerian reference work ever published At nearly 600 pages it contains 3600 entries 2200 principal 1400 secondary representing the work of 1475 authors Fifteen broad groupings encompass seventy topical headings many of which are divided and subdivided again resulting in a total of 271 headings under which entries are collected

Grounding the Analysis of Cognitive Processes in Music Performance Linda Kaastra, 2020-10-25 Through the systematic analysis of data from music rehearsals lessons and performances this book develops a new conceptual framework for studying cognitive processes in musical activity *Grounding the Analysis of Cognitive Processes in Music Performance* draws uniquely on dominant paradigms from the fields of cognitive science ethnography anthropology psychology and psycholinguistics to develop an ecologically valid framework for the analysis of cognitive processes during musical activity By presenting a close analysis of activities including instrumental performance on the bassoon lessons on the guitar and a group rehearsal chapters provide new insights into the person instrument system the musician's use of informational resources and the organization of perceptual experience during musical performance Engaging in musical activity is shown to be a highly dynamic and collaborative process invoking tacit knowledge and coordination as musicians identify targets of focal awareness for themselves their colleagues and their students Written by a cognitive scientist and classically trained bassoonist this specialist text builds on two decades of music performance research and will be of interest to researchers academics and postgraduate students in the fields of cognitive psychology and music psychology as well as musicology ethnomusicology music theory and performance science Linda T Kaastra has taught courses in cognitive science music and discourse studies at the University of British Columbia UBC and Simon Fraser University She earned a PhD from UBC's Individual Interdisciplinary Graduate Studies Program

Interpreting Chopin: Analysis and Performance Alison

Hood,2017-05-15 Music theory is often seen as independent from even antithetical to performance While music theory is an intellectual enterprise performance requires an intuitive response to the music But this binary opposition is a false one which serves neither the theorist nor the performer In *Interpreting Chopin* Alison Hood brings her experience as a performer to bear on contemporary analytical models She combines significant aspects of current analytical approaches and applies that unique synthetic method to selected works by Chopin casting new light on the composer's preludes nocturnes and barcarolle An extension of Schenkerian analysis the specific combination of five aspects distinguishes Hood's method from previous analytical approaches These five methods are attention to the rhythms created by pitch events on all structural levels a detailed accounting of the musical surface strict use of analytical notation following guidelines offered by Steve Larson a continual concern with what have been called strategies or premises and an exploration of how recorded performances might be viewed in terms of analytical decisions or might even shape those decisions Building on the work of such authors as William Rothstein Carl Schachter and John Rink Hood's approach to Chopin's oeuvre raises interpretive questions of central interest to performers

Topics in Musical Interpretation Sezi Seskir,David Hyun-su Kim,2022-09-29 While interpretation of musical scores is amongst the most frequent of musical activities it is also strangely one of the least researched This collection of essays seeks to remedy this deficit by illuminating ways in which today's curious musician interested in probing beyond the dictates of a faintly understood score can engage more deeply and thoughtfully with the act of interpretation Skilful musical interpretation draws on a vast range of knowledges The chapters of this collection accordingly address a similarly broad set of issues including notation rhetoric theory historiography performers past and present instrument builders concert presenters reception history and more Written by leading experts from a variety of musical subdisciplines these essays are designed to be accessible and practically relevant for musical performance Many of the chapters utilize case studies and as such will be useful for university and conservatory level students as well as music scholars The chapters in this book were originally published as a special issue of the *Journal of Musicological Research*

The Music Practitioner Jane W. Davidson,2017-07-05 Useful work has been done in recent years in the areas of music psychology philosophy and education yet this is the first book to provide a wide assessment of what practical benefits this research can bring to the music practitioner With 25 chapters by writers representing a broad range of perspectives this volume is able to highlight many of the potential links between music research and practice The chapters are divided into five main sections Section one examines practitioners use of research to assist their practice and the ways in which they might train to become systematic researchers Section two explores research centred on perception and cognition while section three looks at how practitioners have explored their everyday work and what this reveals about the creative process Section four focuses on how being a musician affects an individual's sense of self and the how others

perceive him or her The essays in section five outline the new types of data that creative researchers can provide for analysis and interpretation The concluding chapter discusses that key question what makes music affect us in the way it does The research findings in each chapter provide useful sources of data and raise questions that are applicable across the spectrum of music related disciplines Moreover the research methodologies applied to a specific question may have broader application for readers wishing to take on research themselves
