The Predicament Of Democratic Man:

The Predicament of Democratic Man Edmond Nathaniel Cahn, 1961 *Collected Works of George Grant* George Grant, 2000 **Vigilante Politics** H. Jon Rosenbaum, Peter C. Sederberg, 2016-11-11 Vigilante politics is an organized effort outside legitimate channels to suppress or eradicate any threats to the status quo Simply defined it means deliberately taking the law into one's own hands The history of the United States is filled with many examples of establishment violence This form of violence was evident when ranchers lynched the cattle rustler and when the early Ku Klux Klan terrorized African Americans back into their proper position It is also apparent when urban community groups execute drug pushers and when political parties resort to breaking and entering electronic surveillance sabotage and seduction Establishment violence is a global phenomenon and not restricted to the United States In Brazil the Esquadra da Morte Death Squad executes individuals suspected of being habitual criminals The Protestant B Specials in Northern Ireland abused Catholics Strong anti-Chinese feelings spawned vigilante groups in Southeast Asia Other vigilante bands have included the Society of Muslim Brothers in Egypt the White Hand of Guatemala the Jewish Defense League and the Nazi Brown Shirts Every society that is holding together contains groups that value their place in the system even if it is modest and prefer things as they are If they believe that criminals are escaping punishment because of corruption or leniency or that people who seek a change in social status and approved values a regaining power or that the legitimate authorities are unable or unwilling to preserve the present order they frequently take violent action to defend their position These are the vigilantes and this book considers their brand of establishment violence in the widest sense Their goals tactics personalities and place in a country's general political configuration are thoroughly analyzed by the historians political scientists sociologists and psychologists who have contributed to this volume Part I is devoted to theory and offers a typology of vigilantism Part II covers vigilante episodes in the United States Part III places vigilantism in a comparative perspective with examples from Asia Africa and Europe **The Orthocratic State** Martin Sicker, 2003-06-30 Sicker argues that it is the achievement of orthocracy as the motivating concept of the state rather than democracy as its optimum form that is crucial for mankind in the 21st century notwithstanding that the widespread adoption of substantive democracy may be the best currently conceivable means for reaching the goal of universal responsible statehood In a critique of much modern political theory Sicker reexamines the essential idea of the state as well as its purpose as understood from a variety of perspectives a subject that has largely been neglected over the past several decades as a subject of interest to political theorists in the United States He then considers the relationship of the state to its constituents a subject that leads to a discussion of rights and obligations and whether that relationship is defined entirely by the state or whether its constituents are endowed with natural rights that are independent of the state that the state must take into account in asserting its authority This is followed by an extensive discussion of the corollary concepts of generic social political and economic equality and concludes with a consideration of some ideas that

might serve as the motivating principles of an orthocratic state The treatment of equality developed by Sicker differs in a number of respects from the approach taken in a good deal of modern writing on political theory much of which is primarily concerned with the question of individual liberty However he argues equality must necessarily take precedence over liberty in the hierarchy of social values that the primary social value is not liberty but equality and that the claim of a right to individual liberty is clearly predicated on the presumed equality of men in society This is a thoughtful analysis that will be of concern to scholars and students involved with political theory as well as the concerned citizen

An International Peace Court Thomas Holton, 2013-12-01 The classical concept of International Law as developed by Gentili Gro tius and their successors accepted as its starting point the sovereignty of states from which it followed that the rules of International Law were based upon the general consent of those states and 2 that since state sovereignty was not capable of limitation otherwise than by the consent of the state itself in the last resort International Law must accept the fact of war Two world wars within the space of thirty years and the development of nuclear weapons of unlimited potential have compelled statesmen and lawyers to take a fresh look at the foundations of international relations The First World War was followed by the creation of the League of Nations and by the establishment of the Permanent Court of International Justice The failure of both insofar as the preservation of peace was concerned was apparent in the continuance of international insecurity culminating in World War II This again was followed by the establishment of a new international organisation the United Nations with its auxiliary the International Court of Justice Nevertheless international security seems further away than ever and it may be suggested that it is the devastating potential of nuclear weapons rather than the strength of international machinery which has so far prevented a third general conflict far more disastrous than either of the two World Wars which have already taken place

Reclaiming Religion from the Church Frank Canatella, 2003-02 The first rule of life is survive And since we are necessarily social we must add the corollary together All oughts derive from this two part rule Most of us understand this intuitively if not explicitly The only issue to be resolved is how inclusive is our togetherness Is it just our tribe our nation the northern hemisphere Or must we include the whole human family These are the moral issues we must answer and they are empirical questions Behavior has consequences We have to ask ourselves Will such and such behaviors promote survival The answer can only come from the experience of the community Present demographics will not allow us to elude the question much longer Church rules can be faulted on a number of counts not the least of which is that God gave us the rules so they can't change even when experience indicates that they should Also the church leaders think the purpose of the rules is to save our souls and so our life here has been seriously neglected in many respects especially for the poor and the underclass because everything is supposed to be made right in the hereafter This I regard as backward It affirms those who oppress the poor Scientists make inferences from

empirical data and the results are always subject to revision Church officials make inferences from myths and they are set in stone A good example is the doctrine of Original Sin that is presented as an occult event that causes all our problems and about which we can do nothing The church approved of slavery for the better part of two millennia because it was in place when the church was created and St Augustine justified it as one of the punishments resulting from Original Sin Clearly our problem is ignorance the kind we are born with and the kind we acquire through learning falsely I call this Ignorance II after Gregory Bateson s Learning II learning how to learn Ignorance II is a learning dead end learning how not to learn We very obviously do not always know how to act in our own best interests Our best chance of breaking out of this mold is through sharing the best of our communal experience to discover how to act in our own best interests in the long run This is how to develop a proper morality one we can all live with With a superior organization in place the church is positioned to unite us in the task of developing a proper morality However the church as presently structured can only evolve by backing into the future It claims to already know everything that is necessary to know so it has difficulty learning thus denying it s human origin and makeup To change the church requires a spin on history that demonstrates a development and continuity with the past instead of just saying We have been wrong The People of God the true Church show signs of reclaiming religion through various dissident groups These groups do not yet recognize the intimate connection between morality and survival My hope is that this book will guide them toward that recognition
