The Primordial Challenge Ethnicity In The Contemporary World:

The Primordial Challenge John F. Stack, 1986-10-16 Ethnicity plays a vital role in contemporary world politics This collection of essays documents the international dimensions of ethnic identity by examining the interaction between ethnicity and the actions of modern nation states in a variety of global regional and urban settings throughout the world The editor John F Stack Jr provocatively argues that the dynamics of ethnicity in the contemporary world are best examined from the perspective of primordial attachments those givens of social existence based on family ties race custom language religion and region This perspective is disputed by a number of the contributors who see ethnicity as the result of instrumental forces state building socioeconomic class modernization political development and the transformation of the global political economy

Liberia Noah Berlatsky, 2014-06-06 This collection of essays explores years of conflict and violence in Liberia during the First and Second Liberian Civil Wars and the acts of genocide and crimes against humanity that have resulted Personal narratives include the story of a Liberian woman who remembers fleeing Liberia as a refugee a Liberian woman who recalls being a rebel soldier and Liberians in Minnesota who tell stories of abuse and torture

Governance, Institutions and the Human Condition W. Gachenga, G. Franceschi, 2009 Strathmore University organised the Fifth Annual Ethics Conference on Governance Institutions and the Human Condition Research papers were presented in four sessions corresponding to four key milestones in the crisis that almost tore Kenya apart in January February 2008 Constitutional law Institutions Education and the Land Issue This book compiles the papers presented at the Conference by outstanding scholars and renowned personalities

Nations and Nationalism in a Global Era Anthony Smith, 2013-05-28 In a world of transnational economics and mass communications ethnic conflict and nationalism have recently re emerged as major political forces Is this due to the advance of modernity Will a global culture supersede nationalism In fact the revolution of modernity has revitalized ethnic memories and communities as people look for stability and meaning in an age of unprecedented change and return to their ethnic heritages Ethnic nationalism challenges but also reinforces the national state By comparison supra national ideals seem vague and pale and the dream of a cosmopolitan global culture is utopian For all its shortcomings Anthony Smith argues the nation and its nationalism is likely to remain the only realistic and widespread popular ideal of community

New Culture in a New World David Kenley, 2004-06 During the 1920s China s intellectuals called for a new literature system of thought and orientation towards modern life the May Fourth Movement or the New Culture Movement spilled beyond China to the overseas Chinese communities This work analyzes the New Culture Movement from a diaspora perspective of the overseas Chinese in Singapore

Clausewitz and African War Isabelle Duyvesteyn, 2004-09-30 This book shows that wars that have hitherto been mainly interpreted as driven by economic resource ethnic or clan interests such as the conflicts in Liberia and Somalia in the early 1990s do have an overriding political rationale which revalidates Carl von Clausewitz s nineteenth century understanding of war

Choosing an

Identity Sun-Ki Chai, 2001-08-30 DIV Challenges the conventional rational choice approaches with one that allows for cultural diversity and change div

Modernity At Large Arjun Appadurai, 1996 *The Structural Prevention of Mass Atrocities* Stephen McLoughlin, 2014-07-17 This book offers a different approach to the structural prevention of mass atrocities It investigates the conditions that enable vulnerable countries to prevent the perpetration of such violence Structural prevention is commonly framed as the identifying and ameliorating of the root causes of violent conflict a process which typically involves international actors determining what these root causes are and what the best courses of action are to deal with them This overlooks why mass atrocities do not occur in countries that contain the presence of root causes In fact very little research has been conducted on what the causes of peace and stability are particularly in relatively countries located in regions marred by civil war and mass atrocities To better understand how such vulnerable countries prevent the commission of mass atrocities this book proposes an analytical framework which enables not only an understanding of risk which arises from the presence of root causes but also of the factors that build resilience in countries and consequently mitigate and manage such risk Using this framework three countries Botswana Zambia and Tanzania are analysed to account for their long term stability despite their location in neighbourhoods characterised by decades of civil war ethnic repression and mass atrocities This work is a significant contribution to the field of genocide studies and crimes against humanity and will be of interest to students and scholars alike

Nationalism John Hutchinson, Anthony D. Smith, 2000 A comprehensive collection of articles on the subject of nationalism It covers concepts and definitions forms of nationalism worldwide and nationalism and culture and feminism and politics
