The Privacy Of The Self:

The Privacy of the Self Masud Khan, 2018 The Privacy of the Self was the first collection of papers showing the development of Masud Khan's thinking over twenty five years of clinical work. He was nurtured in the tradition of Anna Freud, John Rickman and D W Winnicott but his contribution to psychoanalytic literature was a distinctive and personal one. What emerges from this book is the natural and private crystallization of his experiences with his patients and teachers. As he says in his preface: Psychoanalysis is an extremely private discipline of sensibility and skill. The practice of psychoanalysis multiplies this privacy into a specialized relationship between two persons who through the very nature of their exclusivity with each other change each other. The first thing I wish to say about my work reported in these papers is that my patients have helped me become and personalize my potential of thought, affectivity and effort into a way of life that I find deeply satisfying. Had I followed another career perhaps my life would have been more dramatic and varied but certainly not fuller. My relation with my patients has taught me the humility and necessity of the need of the other for one to be and become oneself. Two further collections of Masud Khan's papers, *Alienation in Perversions* and *Hidden Selves*, Between Theory and Practice in Psychoanalysis are available in Mansfield Library editions. Provided by publisher **The Privacy of the Self** MASUD. KHAN, Taylor & Francis Group, 2019-07-10 *The Privacy of the Self* M. Masud R. Andreotta, 2024-12-23 In the big data age providing informed consent online has never been more challenging Countless companies collect and share our personal data through devices apps and websites fuelling a growing data economy and the emergence of surveillance capitalism Few of us have the time to read the associated privacy policies and terms and conditions and thus are often unaware of how our personal data are being used This is a problem as in the last few years large tech companies have abused our personal data As privacy self management through the mechanism of providing online consent has become increasingly difficult some have argued that surveillance capitalism and the data economy more broadly need to be overthrown This book presents a different perspective It departs from the concept of revolutionary change to focus on pragmatic incremental solutions tailored to everyday contexts It scrutinises how consent is currently sought and provided online and offers suggestions about how online consent practices can be improved upon These include the possibility of subjecting consent gathering practices to ethics committees for review the creation of visual based consent agreements and privacy policies to help with transparency and engagement the development of software to protect privacy

and the idea of automated consent functionalities that allow users to bypass the task of reading vast amounts of online consent agreements The author suggests that these small scale changes to online consent obtaining procedures could if successfully implemented provide us with a way of self managing our privacy in a way that avoids a revolutionary dismantling of the data economy In the process readers are encouraged to rethink the very purpose of providing informed consent online Rethinking Informed Consent in the Big Data Age will appeal to researchers in normative ethics applied ethics philosophy of law and the philosophy of AI It will also be of interest to business scholars communication researchers students and those in industry
