Death, Contemplation and Schopenhauer R. Raj Singh, 2007-01-01 The connections between death contemplation and the contemplative life have been a recurrent theme in the canons of both western and eastern philosophical thought This book examines the classical sources of this philosophical literature in particular Plato's *Phaedo* and the *Katha Upanishad* and then proceeds to a sustained analysis and critical assessment of the sources and standpoints of a single thinker Arthur Schopenhauer whose work comprehensively pursues this problem The book traces the pivotal issue of death through the whole range of Schopenhauer's writings uncovering the deeper connotations of his crucial notion of the will to live

**Deleuze and the Fold: A Critical Reader** Sjoerd van Tuinen, N. McDonnell, 2009-11-30 Featuring contributions by leading academics this collection is a companion to one of the most intricate of Deleuze's philosophical texts articulating Leibnizian thought within the context of Baroque expressionism characterized by its interdisciplinary approach to philosophy This reader offers an incisive critical overview of its key themes

**Physics and Philosophy of Nature in Greek Neoplatonism** Riccardo Chiaradonna, F. T. Trabattori, 2009 Traditional scholarship has generally neglected the philosophy of nature in Greek Neoplatonism In the last few decades however this attitude has changed radically Natural philosophy has increasingly been regarded as a crucial aspect of late antique thought Furthermore several studies have outlined the impressive historical legacy of Neoplatonic physics Building on this new interest the ten papers published here concentrate on Neoplatonic philosophy of nature from Plotinus to Simplicius and on its main conceptual features and its relation to the previous philosophical and scientific traditions The papers were presented at a conference sponsored by the European Science Foundation in Castelveccchio Pascoli in June 2006 This volume makes an important contribution to the understanding of Greek Neoplatonism and its historical significance

*American Book Publishing Record*, 2007 **Technologies of Life and Death** Kelly Oliver, 2013-06-05 The central aim of this book is to approach contemporary problems raised by technologies of life and death as ethical issues that call for a more nuanced approach than mainstream philosophy can provide To do so it draws on the recently published seminars of Jacques Derrida to analyze the extremes of birth and dying insofar as they are mediated by technologies of life and death With an eye to reproductive technologies it shows how a deconstructive approach can change the very terms of contemporary debates over technologies of life and death from cloning to surrogate motherhood to capital punishment particularly insofar as most current discussions assume some notion of a liberal individual The ethical stakes in these debates are never far from political concerns such as enfranchisement citizenship oppression racism sexism and the public policies that normalize them *Technologies of Life and Death* thus provides pointers for rethinking dominant philosophical and popular assumptions about nature and nurture chance and necessity masculine and feminine human and animal and what it means to be a mother or a father In part the book seeks to disarticulate a tension between ethics and politics that runs through these issues in order to suggest a more ethical politics by turning the force of

sovereign violence back against itself In the end it proposes that deconstructive ethics with a psychoanalytic supplement can provide a corrective for moral codes and political clichés that turn us into mere answering machines **Play Among Books**

Miro Roman,Alice\_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice\_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science *Philosophical Discussion in Moral Education* Tim Sprod,2003-10-04 In recent

years there has been an increase in the number of calls for moral education to receive greater public attention In our pluralist society however it is difficult to find agreement on what exactly moral education requires *Philosophical Discussion in Moral Education* develops a detailed philosophical defence of the claim that teachers should engage students in ethical discussions to promote moral competence and strengthen moral character Paying particular attention to the teacher's role this book highlights the justification for and methods of creating a classroom community of ethical inquiry **The Sermon**

**on the Mount and Spiritual Exercises** George Branch-Trevathan,2020-03-31 What in Matthew's view should a human being become and how does one attain that ideal In *The Sermon on the Mount and Spiritual Exercises* The Making of the Matthean Self George Branch Trevathan presents a new account of Matthew's ethics and argues that the evangelist presents the Sermon on the Mount as functioning like many other ancient sayings collections that is as facilitating transformative work on oneself or spiritual exercises that enable one to realize the evangelist's ideals The conclusion suggests some implications for our understanding of ethical formation in antiquity and the study of ethics more generally This will be an essential volume for scholars studying the Gospel of Matthew early Christian ethics the relationships between early Christian and ancient philosophical writings or ethical formation in antiquity **The Oxford Handbook of Philosophy of Education**

Harvey Siegel,2009-10-30 Philosophy of education has an honored place in the history of Western philosophical thought Its questions are as vital now both philosophically and practically as they have ever been In recent decades however philosophical thinking about education has largely fallen off the philosophical radar screen Philosophy of education has lost intimate contact with the parent discipline to a regrettably large extent to the detriment of both *The Oxford Handbook of Philosophy of Education* is intended to serve as a general introduction to key issues in the field to further the philosophical pursuit of those issues and to bring philosophy of education back into closer contact with general philosophy Distinguished philosophers and philosophers of education most of whom have made important contributions to core areas of philosophy turn their attention in these 28 essays to a broad range of philosophical questions concerning education The chapters are accessible to readers with no prior exposure to philosophy of education and provide both surveys of the general domain they

address and advance the discussion in those domains in original and fruitful ways Together their authors constitute a new wave of general philosophers taking up fundamental philosophical questions about education the first such cohort of outstanding general philosophers to do so in English in a generation      **Between Philosophy and Religion, Vol. I** Brayton Polka, 2006-10-26 In *Between Philosophy and Religion Volumes I and II* Brayton Polka examines Spinoza's three major works on religion politics and ethics in order to show that his thought is at once biblical and modern Indeed Polka argues that Spinoza is biblical only insofar as he is understood to be one of the great philosophers of modernity and that he is modern only when it is understood that he is unique in making the interpretation of the Bible central to philosophy and philosophy central to the interpretation of the Bible This book and its companion volume are essential reading for any scholar of Spinoza
