Atlanta Paradox David L. Sjoquist, 2000-05-25 Despite the rapid creation of jobs in the greater Atlanta region poverty in the city itself remains surprisingly high and Atlanta's economic boom has yet to play a significant role in narrowing the gap between the suburban rich and the city poor This book investigates the key factors underlying this paradox The authors show that the legacy of past residential segregation as well as the more recent phenomenon of urban sprawl both work against inner city blacks Many remain concentrated near traditional black neighborhoods south of the city center and face prohibitive commuting distances now that jobs have migrated to outlying northern suburbs The book also presents some promising signs Few whites still hold overt negative stereotypes of blacks and both whites and blacks would prefer to live in more integrated neighborhoods The emergence of a dynamic black middle class and the success of many black owned businesses in the area also give the authors reason to hope that racial inequality will not remain entrenched in a city where so much else has changed A Volume in the Multi City Study of Urban Inequality **Atlanta Paradox** David L.

The Paradoxes of Integration J. Eric Oliver, 2010-05-15 The United States is rapidly changing from a country monochromatically divided between black and white into a multiethnic society The Paradoxes of Integration helps us to understand America's racial future by revealing the complex relationships among integration racial attitudes and neighborhood life J Eric Oliver demonstrates that the effects of integration differ tremendously depending on which geographical level one is examining Living among people of other races in a larger metropolitan area corresponds with greater racial intolerance particularly for America's white majority But when whites blacks Latinos and Asian Americans actually live in integrated neighborhoods they feel less racial resentment Paradoxically this racial tolerance is usually also accompanied by feeling less connected to their community it is no longer theirs Basing its findings on our most advanced means of gauging the impact of social environments on racial attitudes The Paradoxes of Integration sensitively explores the benefits and at times heavily borne costs of integration

American Muslim Women Jamillah Karim, 2009 Focusing on women who sometimes move outside of their ethnic Muslim space and interact with other Muslim ethnic groups in search of gender justice this ethnographic study of African American and South Asian immigrant Muslims in Chicago and Atlanta explores how Islamic ideas of racial harmony and equality create hopeful possibilities in an American society that remains challenged by race and class inequalities Page 4 of cover

Cities of Knowledge Margaret Pugh O'Mara, 2015-02-17 What is the magic formula for turning a place into a high tech capital How can a city or region become a high tech powerhouse like Silicon Valley For over half a century through boom times and bust business leaders and politicians have tried to become the next Silicon Valley but few have succeeded This book examines why high tech development became so economically important late in the twentieth century and why its magic formula of people jobs capital and institutions has been so difficult to replicate Margaret O Mara shows that high tech regions are not simply accidental market creations but cities of knowledge planned communities of scientific production that were shaped and subsidized by the original venture capitalist the Cold War defense complex At the heart of the story is the American research university an institution enriched by Cold War spending and actively engaged in economic development The story of the city of knowledge broadens our understanding of postwar urban history and of the relationship between civil society and the state in late twentieth century America It leads us to further redefine the American suburb as being much more than formless sprawl and shows how it is in fact the ultimate
