The Atlantic Commonwealth A Penguin Special:

For God's Sake, Go! Sir George Edward Gordon Catlin, 1896-1979 was an English political scientist and philosopher A strong proponent of Anglo America cooperation he worked for many years as a professor at Cornell University and other universities and colleges in the United States and Canada He preached the use of a natural science model for political science He took up the relatively new field of political science This was better established in the USA and at the invitation of the historian Wallace Notestein he began lecturing at Cornell University where he had the close association of Carl Becker Catlin married the English novelist Vera Brittain in 1925 after a courtship that began as a correspondence She was pursuing her own career as a writer in Britain and the marriage endured many Atlantic wide separations They went on to have two children John Brittain Catlin 1927-1987 whose memoirs *Family Quartet* appeared in 1987 and British politician Shirley Williams born 1930 Between 1928 and 1931 Catlin was attached to the personal staff of Sir Oswald Mosley This was a period before Mosley had made his final break with the Labour Party to become openly fascist In 1929 he assisted H G Wells Arnold Bennett and others in establishing *The Realist* magazine *Britain's War Machine* David Edgerton, 2011-09-09 The familiar image of the British in the Second World War is that of the plucky underdog taking on German might David Edgerton's bold compelling new history shows the conflict in a new light with Britain as a very wealthy country formidable in arms ruthless in pursuit of its interests and in command of a global production system Rather than belittled by a Nazi behemoth Britain arguably had the world's most advanced mechanized forces It had not only a great empire but allies large and small Edgerton shows that Britain fought on many fronts and its many home fronts kept it exceptionally well supplied with weapons food and oil allowing it to mobilize to an extraordinary extent It created and deployed a vast empire of machines from the humble tramp steamer to the battleship from the rifle to the tank made in colossal factories the world over Scientists and engineers invented new weapons encouraged by a government and prime minister enthusiastic about the latest technologies The British indeed Churchillian vision of war and modernity was challenged by repeated defeat at the hands of less well equipped enemies Yet the end result was a vindication of this vision Like the United States a powerful Britain won a cheap victory while others paid a great price Putting resources machines and experts at the heart of a global rather than merely imperial story Britain's War Machine demolishes timeworn myths about wartime Britain and gives us a groundbreaking and often unsettling picture of a great power in action *An Anglo-German Dialogue* Adolf M.
