Publisher information *Atlas of Satellite Observations Related to Global Change* Robert J. Gurney, James L. Foster, Claire L. Parkinson, 1993-11-25 Global environmental change is one of the most pressing international issues of the next century There is a need to monitor the Earth's vital signs from atmospheric ozone to tropical deforestation to sea level change Models used to predict global changes have not yet fully used global observational data sets Satellite data sets will be vital in addressing global change issues in determining natural variability and monitoring global and regional changes This timely volume provides an illustration of the variety of satellite derived global data sets now available their uses advantages and limitations and the range of variation that has already been observed with these data A team of distinguished contributors provide a highly illustrated and accessible account suitable for the general scientific reader *The Atlas of Global Inequalities* Ben Crow, Suresh K. Lodha, 2016-05-04 Drawing on research from around the world this atlas gives shape and meaning to statistics making it an indispensable resource for understanding global inequalities and an inspiration for social and political action Inequality underlies many of the challenges facing the world today and The Atlas of Global Inequalities considers the issue in all its dimensions Organized in thematic parts it maps not only the global distribution of income and wealth but also inequalities in social and political rights and freedoms It describes how inadequate health services unsafe water and barriers to education hinder people's ability to live their lives to the full assesses poor transport energy and digital communication infrastructures and their effect on economic development and highlights the dangers of unclean and unhealthy indoor and outdoor environments Through world regional and country maps and innovative and intriguing graphics the authors unravel the complexity of inequality revealing differences between countries as well as illustrating inequalities within them Topics include the discrimination suffered by children with a disability the impact of inefficient and dangerous household fuels on the daily lives and long term health of those who rely on them the unequal opportunities available to women and the reasons for families descent into and reemergence from poverty **Atlas of Global Change Risk of Population and Economic Systems**, 2022-01-25 This book is open access and illustrates the spatial distribution of the global change risk of population and economic systems with the maps of environment global climate change global population and economic systems and global change risk The risks of global change are mapped at 0.25 degree grid unit The risk results and their contribution rates of the world at national level are unprecedentedly derived and ranked The book can be a good reference for researchers and students in the field of global climate change and natural disaster risk management as well as risk managers and enterpriser to understand the global change risk of population and economic systems **The Atlas of Climate Change: Based on SEAP-CMIP5** Wenjie Dong, Fumin Ren, Jianbin Huang, Yan Guo, 2012-10-18 The Atlas of Climate Change Based on SEAP CMIP5 is intended to satisfy readers curiosity how will our climate system change over the next 100 years It is the first showcase for the state of the art earth system models that released their CMIP5 simulations for the IPCC AR5 The atlas focuses on both the past climate system change from 1850 and the projection of the future climate system change to

2100 using the RCP2.6, RCP4.5 and RCP8.5 scenarios based on climate models. This provides the research and application community interested in the impact of climate change on fields such as agriculture, ecosystem, environment, water resources, energy, health, economy, risk, governance and international negotiation etc with the newest climate change projection information. Additionally, the atlas will show the historical responsibility of the developed and developing countries and possible contributions to the mitigation of climate change according to their pledge of GHG emission reduction after the Cancun Agreement as an extension numerical experiment to CMIP5 with NCAR's CESM1.0. The authors will update this atlas after future releases of CMIP5 model outputs and update the figures in the second edition of the atlas in 2012-2013. Both Prof Wenjie Dong and Yan Guo work at the Beijing Normal University, China. Prof Fumin Ren works at the China Meteorological Administration, China.
