The Barefoot Serpent Scott Morse, 2003 Blends a biography of filmmaker Akira Kurosawa with a story about a family learning to let go *The Serpent's Hymn* Ta Villeneu, In the turbulent heart of 1950s India whispers of an ancient cult stir once more When Anurita Mukherjee a determined investigator follows the trail of a forbidden Kali sect she finds herself entangled in a chilling mystery that blurs the line between devotion and destruction The cult's sinister rites rooted in the serpent's hymn of faith and sacrifice draw her deeper into a world where every truth carries a hidden venom Amid shadows of fanaticism Anurita crosses paths with Anindya Dutta a scholar burdened by secrets of his own Their unlikely alliance transforms into a fragile bond tested by both love and fear as they navigate a land haunted by curses betrayal and the price of blind faith As the serpent's hymn echoes louder threatening to consume them both Anurita and Anindya must confront their darkest truths Is their devotion a salvation or the final offering to an insatiable fate **Michael Chabon**

Robertson, 2015-05-26 In the previous book *The Celtic Serpent* after a diagnosis of cancer and the death of her grandmother Angi Talismann found herself on an incredible journey Shackled to an unstable piece of ancient technology in the form of a medallion she and her colleagues were forced to locate lost medallion gemstones which had been scattered to different countries in the seventeenth century Close on their heels was a resolute killer bent on acquiring the medallion Tracking down the descendants of old Irish and Scottish families assigned to protect this ancient treasure proved a daunting task Eventually locating the gemstones the initial stage of their venture ended with twelve individuals stepping through a golden serpent gate on the Hill of Tara in Ireland propelling them into another world While stating they would return in three months its assurance was uncertain The journey continues in this book Angi and her companions quickly adapt to their new environment on Tir na nOg the land of the Tuatha de Danann deemed to be the ancient gods of the Irish Here they learn that their escort Sirona is a distinguished member of the kingdom and her ancestor Myttrwn is a gifted scientist and magician supposedly centuries old in Earth terms Under Myttrwn's guidance the twelve discover a different perspective of the universe learn the healing and destructive powers of light and sound and gain some insight into their future role while Angi takes her first steps in mastering the complexities of her medallion Yet with all the goodwill a powerful

Species, Serpents, Spirits, and Skulls Sherrie Lynne Lyons, 2010-07-02 Science permeates nearly every aspect of our lives and yet as current debates over intelligent design the causes of global warming and alternative health practices indicate the question of how to distinguish science from pseudoscience remains a difficult one. To address this question Sherrie Lynne Lyons draws on four examples from the nineteenth century sea serpent investigations spiritualism phrenology and Darwin's theory of evolution. Each attracted the interest of prominent scientists as well as the general public yet three remained at the edges of scientific respectability while the fourth evolutionary theory although initially regarded as scientific heresy ultimately became the new scientific orthodoxy.

Taking a serious look at the science behind these examples Lyons argues that distinguishing between science and pseudoscience particularly in the midst of discovery is not as easy as the popular image of science tends to suggest Two examples of present day controversies surrounding evolutionary psychology and the meaning of fossils confirm this assertion She concludes that although the boundaries of what constitutes science are not always clear cut the very intimate relationship between science and society rather than being a hindrance contributes to the richness and diversity of scientific ideas Taken together these entertaining and accessible examples illuminate important issues concerning the theory practice and content of science
