The concept of law Herbert Lionel Adolphus Hart,1975 *The Concept of Law* H. L. A. Hart,1970

The Concept of Ideals in Legal Theory Sanne Taekema,2002-12-31 Talk about law often includes reference to ideals of justice equality or freedom But what do we refer to when we speak about ideals in the context of law This book explores the concept of ideals by combining an investigation of different theories of ideals with a discussion of the role of ideals in law A comparison of the theories of Gustav Radbruch and Philip Selznick leads up to a pragmatist theory of legal ideals which provides an interesting new position in the debate about values in law between legal positivists and natural law thinkers Attention for law s central ideals enables us to understand law s autonomous character while at the same time tracing its connection to societal values Essential reading for anyone interested in the role of values or ideals in law

The Concept of Sin Frederick Robert Tennant,1912 *The Concept Standard* Anne Mary Nicholson,1910

The Concept Of Law (Oip) Herbert Lionel Adolphus Hart,2002-10-24 The Book Has Extensive Notes On The Theoretical Work Of Other Jurists Including References To Austin S Imperative Theory Kelson S Theory Of Basic Norm And Fuller S Natural Law Theory

The Concept of Scientific Law in the Philosophy of Science and Epistemology Igor Hanzel,2013-03-14 The author argues that a reconstruction of scientific laws should give an account of laws relating phenomena to underlying mechanisms generating them as well as of laws relating this mechanism to its inherent capacities While contemporary philosophy of science deals only with the former the author provides the concept for the reconstruction of scientific laws where the knowledge of the phenomena enables one to grasp the quantity of their cause He then provides the concepts for scientific laws dealing with the relation of the quantity and quality of the cause underlying phenomena to the quality and quantity of its capacities Finally he provides concepts for scientific laws expressing how a certain cause due to the quantity and quality of its capacities generates the quantitative and qualitative determinations of its manifestations The book is intended for philosophers of science and philosophers of social science as well as for natural and social scientists

The Concept of Due Process of Law in 1866 and Its Influence on the Fourteenth Amendment Herbert Thompson Leyland,1922

Positive Law from the Muslim World Baudouin Dupret,2021-06-24 Can the concept of law be indiscriminately extended to times and places in which it did simply not exist Such an extension is at best useless and at worst misleading Producing an intelligible jurisprudence of the concept of law means keeping it within the reasonable boundaries of its contemporary common sense understanding positive law Parallel to Western societies in which it firstly emerged the concept of positive law developed in many places including countries characterized as Muslim There it faced other existing normativities like customs and the Sharia This book aims from the

Muslim world's perspective to clarify the uses of the concept of law and the ways of studying it to describe some of its historical developments including the ideas of constitutional law customary law and forensic evidence and to describe present day practices including reference to law sources rules and interpretation *The Concept of Treaty in International Law* Jan Klabbers, 2023-09-25 Whether or not a certain norm is legally binding upon international actors may often depend on whether or not the instrument which contains the norm is to be regarded as a treaty In this study the author argues that instruments which contain commitments are ex hypothesi treaties In doing so he challenges popular notions proclaiming the existence of morally and politically binding agreements and so called soft law Such notions Klabbers argues are internally inconsistent and founded upon untenable presumptions Moreover they find little support in the pertinent decisions of municipal and international courts and tribunals The book addresses issues of importance not only for academics working in international law constitutional law and political science but also for practitioners involved in the making implementation and enforcement of international agreements *The concept of law* Herbert Lionel Adolphus Hart, 1963 **The Lutheran Church Review** Henry Eyster Jacobs, Theodore Emanuel Schmauk, 1918 The World's Legal Philosophies Fritz Berolzheimer, 1912 The present volume is the second of his five volume work published by Beck at Munich 1904 1907 under the title *System der rechts und wirtschaftsphilosophie* Recueil Des Cours, Collected Courses, 1972 , 1974-06-24
