that formed the Hanseatic League created an important network of commerce throughout the Baltic and North Sea area. From Russia in the east to England and France in the west the cities of the Hanseatic League created a vast northern maritime trade network. The aim of this volume is to present a state of the field English language volume by some of the most respected Hanse scholars. What impact did the cultural origins and religious backgrounds of the merchants in the early modern period have on their business activities? How did these people manage to integrate themselves into the foreign societies within which they lived and worked? In this book Jorun Poettering examines the circumstances of the merchants who traded between Hamburg and Portugal in the seventeenth century. Her study offers new insights into the history of migration and intercultural encounter as the world became more interconnected. [The Sovereign State and Its Competitors](#) Hendrik Spruyt, 2020-05-05. The present international system composed of the most part of sovereign territorial states is often viewed as the inevitable outcome of historical development. Hendrik Spruyt argues that there was nothing inevitable about the rise of the state system. However, examining the competing institutions that arose during the decline of feudalism among them urban leagues, independent communes, city states and sovereign monarchies, Spruyt disposes of the familiar claim that the superior size and war-making ability of the sovereign nation state made it the natural successor to the feudal system. The author argues that feudalism did not give way to any single successor institution in simple linear fashion. Instead, individuals created a variety of institutional forms such as the sovereign territorial state in France, the Hanseatic League and the Italian city states in reaction to a dramatic change in the medieval economic environment. Only in a subsequent selective phase of institutional evolution did sovereign territorial authority prove to have significant institutional advantages over its rivals. Sovereign authority proved to be more successful in organizing domestic society and structuring external affairs. Spruyt's interdisciplinary approach not only has important implications for change in the state system in our time but also presents a novel analysis of the general dynamics of institutional change. **Proceedings, American Philosophical Society (vol. 121, No. 1, 1977)**, *Manors and Markets* Bas van Bavel, 2016-08-25. The Low Countries, an area roughly embracing the present-day Netherlands and Belgium, formed a patchwork of varied economic and social development in the Middle Ages, with some regions displaying a remarkable dynamism. *Manors and Markets* charts the history of these vibrant economies and societies and contrasts them with alternative paths of development from the early medieval period to the beginning of the seventeenth century. Providing a concise overview of social and economic changes over more than a thousand years, Bas van Bavel assesses the impact of the

social and institutional organization that saw the Low Countries become the most urbanized and densely populated part of Europe by the end of the Middle Ages By delving into the early and high medieval history of society van Bavel uncovers the foundations of the flourishing of the medieval Flemish towns and the forces that propelled Holland towards its Golden Age Exploring the Low Countries at a regional level van Bavel highlights the importance of localized structures for determining the nature of social transitions and economic growth He assesses the role of manorial organization the emergence of markets the rise of towns the quest for self determination by ordinary people and the sharp regional differences in development that can be observed in the very long run In doing so the book offers a significant contribution to the debate about the causes of economic and social change both past and present
