unique characteristic of Native American medicine is the belief that each patient holds a different spirit and that the healing can only work when it affects the individual spirit. Mythology is essential to this healing process. The belief stories within these pages reflect a culture that holds both poignant and alarming lessons. Readers of this book will discover the intriguing past and knowledge of Native American history and beliefs which are more enlightening than they may have previously realized. TERESA PIJOAN was raised as a young child on San Juan Pueblo Reservation in New Mexico by her Barcelona born father and her New York born mother. When Teresa was twelve years old her family moved to Nambe Indian Reservation. She also spent several summers with her adopted aunt at Hopi. As a University of New Mexico at Valencia history professor, Teresa Pijoan PhD is an internationally acclaimed author, storyteller, and lecturer. She has won many awards for her teaching and her publications. Her other books from Sunstone Press are *American Indian Creation Myths*, *Pueblo Indian Wisdom*, *Ways of Indian Magic*, and *Dead Kachina Man*.

[Empathy and Healing](#) Vieda Skultans, 2008-03-01. For more than three decades the author has been concerned with issues to do with emotion, suffering, and healing. This volume presents ethnographic studies of South Wales, Maharashtra, and post-Soviet Latvia, connected by a theoretical interest in healing, emotion, and subjectivity. Exploring the uses of narrative in the shaping of memory, autobiography, and illness, and its connections with the master narratives of history and culture, it focuses on the post-Soviet clinic as an arena in which the contradictions of a liberal economy are translated into a medical language.

approaches to understanding cultures of health This provocative volume considers the theoretical methodological and ethnographic implications of the fact that medical knowledge is frequently dynamic incoherent and contradictory and that our understanding of it is necessarily incomplete and partial In diverse settings from indigenous cultures to Western medical industries contributors consider such issues as how to define the boundaries of medical knowledge versus other kinds of knowledge how to understand overlapping and shifting medical discourses the medical profession's need for anthropologists to produce explanatory models the limits of the Western scientific method and the potential for methodological pluralism constraints on fieldwork including violence and structural factors limiting access and the subjectivity and interests of the researcher On Knowing and Not Knowing in the Anthropology of Medicine will stimulate innovative thinking and productive debate for practitioners researchers and students in the social science of health and medicine
