Service,1997 A Monastery for the Ibex Wilko Graf von Hardenberg,2021-02-23 Gran Paradiso National Park is Italy s

oldest and was instrumental in preventing the extinction of the Alpine ibex between World War I and just after World War II Today there are more than 30 000 ibex living in the Alps all of which descended from that last colony protected in Gran Paradiso under Mussolini s rule Wilko Graf von Hardenberg merges the history of conservation with the area s social history and Italy s larger political history to produce a multifaceted narrative about the park as an institution the conflicts it triggered and practices adopted to manage the ibex despite hurdles placed by the fascist regime The book s central argument is that in fascist Italy preservation propaganda notwithstanding was a product of the regime s continuities with the previous liberal system Italy s total fascist transformation accomplished only more than a decade after Mussolini took power virtually unmade the early successes of preservation set in place by the nascent nature state in the regime s early years Despite this conflict conservationists succeeded in preserving the ibex Hardenberg positions this success within the broader history of science conservation and tourism in fascist Italy and the Alpine region creating a comprehensive historical background and comparative reference to ongoing debates about the role of nature conservation in general and in relation to the state and its agencies
