Kieran, JeongSuk Pang, Deborah Schifter, Swee Fong Ng, 2016-07-11 This survey of the state of the art on research in early
algebra traces the evolution of a relatively new field of research and teaching practice With its focus on the younger student
aged from about 6 years up to 12 years this volume reveals the nature of the research that has been carried out in early
algebra and how it has shaped the growth of the field The survey in presenting examples drawn from the steadily growing
research base highlights both the nature of algebraic thinking and the ways in which this thinking is being developed in the
primary and early middle school student Mathematical relations patterns and arithmetical structures lie at the heart of early
algebraic activity with processes such as noticing conjecturing generalizing representing justifying and communicating being
central to students engagement
