Awakening Genius in the Classroom Thomas Armstrong, 1998-07-15 Every student is a genius declares author Thomas Armstrong and an educator's most important job is to discover and nurture the genius qualities that all students were born with but that may no longer be obvious. Urging readers to look beyond traditional understandings of what constitutes genius, Armstrong describes 12 such qualities: curiosity, playfulness, imagination, creativity, wonder, wisdom, inventiveness, vitality, sensitivity, flexibility, humor, and joy. He cites research in various fields that supports this broader understanding of genius and explains how influences in the home, the popular media, and the school itself shut down the genius in students. Combining thoughtful insights and practical information, Armstrong offers guiding principles to help educators awaken genius in the classroom, beginning with awakening the genius in themselves. Readers will find dozens of suggested activities and helpful resources to provide genius experiences and create a genial climate in the classroom. In addition, suggestions for further study at the end of each section provide starting points for personal and professional reflection and growth. As it celebrates the potential brainpower waiting to be unlocked in classrooms everywhere, *Awakening Genius in the Classroom* inspires educators to look at their students from a different perspective and to reinvigorate their teaching with a new sense of excitement and possibility. The result, Armstrong concludes, could extend far beyond the classroom and transform not only our schools but the entire world. A Holistic Educator's Journey John P. Miller, 2021-08-01 This memoir describes the journey of John Jack Miller. The book explores how his personal journey is related to the work he has done in holistic education, contemplative education, and spirituality in education. In holistic education, the personal and professional are connected. Professor Miller's journey includes events, books, teachers, and the

many factors in his life that have contributed to his work which includes more than 20 books and extensive travel around the world. An example of the relationship between the personal and the professional is that Jack began meditating in 1974 and this practice has provided the foundation for much of his teaching and writing. Professor Miller's book *The Holistic Curriculum* first published in 1988 along with the publication of the *Holistic Education Review* have been seen as the beginning of holistic education as a field of study. Since his journey has been connected with so many other holistic educators, this book can serve as one perspective on how the field has unfolded over the past 35 years. Besides this historical perspective, the book includes a chapter on his meditation practice as well as his beliefs. There is also a chapter on his teaching and how he attempts to embody holistic education in his classroom. Praise for *A Holistic Educator's Journey*: Rarely does a field builder allow us the opportunity to journey into the life-long journey leading to the formation of the work. With bold transparency, Miller shares his enormously rich professional and personal journey of seven decades with an open hand. He shows us the terrain of his inner and outer life. Lisa Miller, Author, *The Spiritual Child*, Teachers College, Columbia University. Whether in the classroom, writing books, keynoting, or being a friend, Jack Miller's life journey exemplifies his multi-dimensional embracing of the way of nature and accepting of the mysterious. Always acknowledging the Indigenous roots of holistic education, he managed to bring parts of the Indigenous worldview into schools in ways that accommodated all cultures. This book gives testimony to his great contribution to understanding why we must return to our interconnected way of being. Four Arrows, Author, *Sitting Bull's Words for a World in Crisis*.
