Professor of Philosophy at Cornell University

THE METAPHYSICAL FOUNDATIONS OF MODERN PHYSICAL SCIENCE

The author writes: "An intensive study of the classic English thinkers early taught me that no one could hope to appreciate the motives underlying their work till he had mastered the philosophy of the one Englishman whose authority and influence in modern times has rivalled that of Aristotle over the late medieval epoch—Sir Isaac Newton".

He has attempted therefore "to plunge into the philosophy of early modern science, treating its key assumption as they appear, and following them out to their classic formulation in the metaphysical paragraphs of Sir Isaac Newton."
