Photoinduced Phase Transitions Keiichir? Nasu, 2004 A new class of insulating solids was recently discovered When irradiated by a few visible photons these solids give rise to a macroscopic excited domain that has new structural and electronic orders quite different from the starting ground state This occurrence is called photoinduced phase transition and this multi authored book reviews recent theoretical and experimental studies of this new phenomenon Why and how do photoexcited few electrons finally result in an excited domain with a macroscopic size How is the resultant photoinduced phase different from the ordinary thermal induced phase This review volume answers those essential questions This book has been selected for coverage in CC Physical Chemical Earth Sciences Index to Scientific Book Contents ISBC Energy Transition in Metropolises, Rural Areas, and Deserts Louis Boisgibault, Fahad Al Kabbani, 2020-02-05 Energy Transition in Metropolises Rural Areas and Deserts presents detailed field studies of energy transition in Lille Riyadh Fayence Bokhol Ouarzazate and the Arabian Desert It analyzes local actions and good practices according to the resources and constraints involved in the process of removing the obstacles to the transition Solutions are sought for the right type of space for buildings transport industry and services and targets are set for Europe the Middle East and Africa as part of the Paris Climate Agreement As a pedagogical tool this book is aimed at not only politicians and professionals but also any members of the public who wish to learn about changes in production and energy consumption Handbook of Materials Modeling Sidney Yip, 2007-11-17 This Handbook contains a set of articles introducing the modeling and simulation of materials from the standpoint of basic methods and studies The intent is to provide a compendium that is foundational to an emerging eld of computational research a new discipline that may now be called Compu tional Materials This area has become suf ciently diverse that any attempt to cover all the pertinent topics would be futile Even with a limited scope the present undertaking has required the dedicated efforts of 13 Subject Editors to set the scope of nine chapters solicit authors and collect the

manuscripts The contributors were asked to target students and non specialists as the primary audience to provide an accessible entry into the field and to offer references for further reading With no precedents to follow the editors and authors were only guided by a common goal to produce a volume that would set a standard toward defining the broad community and stimulating its growth The idea of a reference work on materials modeling surfaced in conversations with Peter Binfield then the Reference Works Editor at Kluwer Academic Publishers in the spring of 1999 The rationale at the time already seemed quite clear the field of computational materials research was taking off powerful computer capabilities were becoming increasingly available and many sectors of the scientific community were getting involved in the enterprise
