The Metropolitan Midwest Barry Checkoway, Carl V. Patton, 1985 *The Handbook of Interior Design* Jo Ann Asher Thompson, Nancy Blossom, 2015-02-09 THE HANDBOOK OF INTERIOR DESIGN The Handbook of Interior Design offers a compilation of current works that inform the discipline of interior design These examples of design scholarship present a detailed overview of current research and critical thinking The volume brings together a broad range of essays from an international group of scholars who represent the diversity of work in the field Intended to engage those involved in the study and practice of interior design the Handbook considers the connections between theory research and practice that shape the field of interior design as well as the theoretical perspectives that inform the field It contains over thirty essays which together demonstrate the wide range of opinions and knowledge in the discipline grouped in sections to reflect key components of their content A close reading of the essays will uncover contradictory as well as supporting positions on aspects of interior design challenging the reader to think critically and develop a personal stance toward the subject

Conflicted Identities Alexandra Staub, 2015-10-23 Nation states have long used representational architecture to create symbolic identities for public consumption both at home and abroad Government buildings major ensembles and urban plans have a visibility that lends them authority while their repeated portrayals in the media cement their image as icons of a shared national character Existing in tandem with this official self however is a second often divergent identity represented by the vast realm of domestic space defined largely by those who occupy it as well as those with a vested interest in its cultural meaning Using both historical inquiry and visual spatial and film analysis this book explores the interaction of these two identities and its effect on political control class status and gender roles *Conflicted Identities* examines the politicization of both public and domestic space especially in societies undergoing rapid cultural transformation through political social or economic expansion or restructuring when cultural identity is being rapidly modernized shifted or realigned to conform to new demands Using specific examples from a variety of national contexts the book examines how vernacular housing legislation marketing and media influence a large but often underexposed domestic culture that runs parallel to a more publicly represented one As a case in point the book examines West Germany from the end of World War II to the early 1970s to probe more deeply into the mechanisms of such cultural dichotomy On a national level post war West Germany demonstratively rejected Nazi era values by rebuilding cities based on interwar modernist tenets while choosing a decidedly modern and transparent architecture for high visibility national projects In the domestic realm government media and everyday citizens countered this turn to state sponsored modernism by embracing traditional architectural aesthetics and housing that encouraged patriarchal family structures Written for readers interested in cultural theory history and the politics of space as well as those engaged with architecture and the built environment *Conflicted Identities* provides an engaging new perspective on power and identity as they relate to architectural settings **Ethnography for Designers**

Galen Cranz,2016-02-26 Ethnography for Designers teaches architects and designers how to listen actively to the knowledge people have about their own culture This approach gives structure to values and qualities It does this by noting the terms and underlying structure of thought people use to describe aspects of their culture By responding to underlying cognitive patterns the architect can both respond to the user and interpret creatively Thus ethno semantic methods can help designers to enhance their professional responsibility to users and at the same time to feel fulfilled creatively This book is a practical guide for those teaching social factors and social research methods to designers and for those using these methods in practice *Community Matters: Service-Learning in Engaged Design and Planning* Mallika Bose,Paula Horrigan,Cheryl Doble,Sigmund C. Shipp,2014-05-09 Winner of the EDRA 2015 Book Award Community Matters Service Learning in Engaged Design and Planning explores issues that resonate with a diverse group of design and planning educators drawn to the challenge of supporting greater community building and empowerment while combining learning with practice The book explores such questions as How do we foster mutuality and reciprocity in community academy partnerships What conflicts challenges limits and obstacles do we face in our service learning studios and projects What evidence do we have of our impacts on students and communities and how are we responding How are we being attentive to the contemporary environmental and societal issues What is our role as both designers and agents of societal change How are we innovating to enable greater capacities for individuals future practitioners and communities This book provides compelling evidence that educators should be adopting engaged pedagogies research methods and theories through which they can bring together education practice and scholarship at the boundary of community and academy **Behind the Fog** Lisa

Martino-Taylor,2017-07-28 Behind the Fog is the first in depth comprehensive examination of the United States Cold War radiological weapons program The book examines controversial military sponsored studies and field trials using radioactive simulants that exposed American civilians to radiation and other hazardous substances without their knowledge or consent during the Cold War Although Western biological and chemical weapons programs have been analyzed by a number of scholars Behind the Fog is a strong departure from the rest in that the United States radiological weapons program has been generally unknown to the public Martino Taylor documents the coordinated efforts of a small group of military scientists who advanced a four pronged secret program of human subject radiation studies that targeted unsuspecting Americans for Cold War military purposes Officials enabled such projects to advance through the layering of secrecy by embedding classified studies in other studies and through outright deception Agency and academic partnerships advanced supported and concealed the studies from the public at large who ultimately served as unwitting test subjects Martino Taylor s comprehensive research illuminates a dark chapter of government secrecy the military industrial academic complex and large scale organizational deviance in American history In its critical approach Behind the Fog effectively examines the mechanisms that allow large scale elite deviance to take place in modern society Urban Public Policy Martin V.

Melosi, 2010-11 The 1992 Los Angeles riots catapulted the problems of the city back onto the policy agenda The cauldron of social problems of the city as the riots showed offers no simple solutions Indeed urban policy includes a range of policy issues involving welfare housing job training education drug control and the environment The myriad of local state and federal agencies only further complicates formulating and implementing coherent policies for the city This volume while not offering specific proposals to remedy the problems of the city provides a broad historical context for discussing contemporary urban policy and for arriving at new prescriptions for relieving the ills of the American city The essays address issues related to public housing poverty transportation and the environment In doing so the authors discuss larger themes in urban policy as well as provide case studies of how policies have been implemented over time in specific cities Of particular interest are two essays that discuss the role of the historian in shaping urban policy and the importance of historical preservation in urban planning

American Architectural History Keith Eggner, 2004 This book presents a collection of recent writings on architecture and urbanism in the United States with topics ranging from colonial to contemporary times

Mapping Decline Colin Gordon, 2014-09-12 Once a thriving metropolis on the banks of the Mississippi St Louis Missouri is now a ghostly landscape of vacant houses boarded up storefronts and abandoned factories The Gateway City is by any measure one of the most depopulated deindustrialized and deeply segregated examples of American urban decay Not a typical city as one observer noted in the late 1970s but like a Eugene O'Neill play it shows a general condition in a stark and dramatic form Mapping Decline examines the causes and consequences of St Louis's urban crisis It traces the complicity of private real estate restrictions local planning and zoning and federal housing policies in the white flight of people and wealth from the central city And it traces the inadequacy and often sheer folly of a generation of urban renewal in which even programs and resources aimed at eradicating blight in the city ended up encouraging flight to the suburbs The urban crisis as this study of St Louis makes clear is not just a consequence of economic and demographic change it is also the most profound political failure of our recent history Mapping Decline is the first history of a modern American city to combine extensive local archival research with the latest geographic information system GIS digital mapping techniques More than 75 full color maps rendered from census data archival sources case law and local planning and property records illustrate in often stark and dramatic ways the still unfolding political history of our neglected cities
