The Politics Of Presidential Appointments:

The Politics of Presidential Appointments G. Calvin Mackenzie, 1981
Appointments David E. Lewis, 2008-04-21 In the wake of Hurricane Katrina many questioned whether the large number of political appointees in the Federal Emergency Management Agency contributed to the agency's poor handling of the catastrophe ultimately costing hundreds of lives and causing immeasurable pain and suffering The Politics of Presidential Appointments examines in depth how and why presidents use political appointees and how their choices impact government performance for better or worse One way presidents can influence the permanent bureaucracy is by filling key posts with people who are sympathetic to their policy goals But if the president's appointees lack competence and an agency fails in its mission as with Katrina the president is accused of employing his friends and allies to the detriment of the public Through case studies and cutting edge analysis David Lewis takes a fascinating look at presidential appointments dating back to the 1960s to learn which jobs went to appointees which agencies were more likely to have appointees how the use of appointees varied by administration and how it affected agency performance He argues that presidents politicize even when it hurts performance and often with support from Congress because they need agencies to be responsive to presidential direction He shows how agency missions and personnel and whether they line up with the president's vision determine which agencies presidents target with appointees and he sheds new light on the important role patronage plays in appointment decisions

The Politics of Presidential Appointments David E. Lewis, 2010-12-16 In the wake of Hurricane Katrina many questioned whether the large number of political appointees in the Federal Emergency Management Agency contributed to the agency's poor handling of the catastrophe ultimately costing hundreds of lives and causing immeasurable pain and suffering The Politics of Presidential Appointments examines in depth how and why presidents use political appointees and how their choices impact government performance for better or worse One way presidents can influence the permanent bureaucracy is by filling key posts with people who are sympathetic to their policy goals But if the president's appointees lack competence and an agency fails in its mission as with Katrina the president is accused of employing his friends and allies to the detriment of the public Through case studies and cutting edge analysis David Lewis takes a fascinating look at presidential appointments dating back to the 1960s to learn which jobs went to appointees which agencies were more likely to have appointees how the use of appointees varied by administration and how it affected agency performance He argues that presidents politicize even when it hurts performance and often with support from Congress because they need agencies to be responsive to presidential direction He shows how agency missions and personnel and whether they line up with the president's vision determine which agencies presidents target with appointees and he sheds new light on the important role patronage plays in appointment decisions [The Politics of Presidential Appointment](#) Sheldon Hackney, 2002-08-01 Historian and former university president Sheldon Hackney recounts how he became an unwitting combatant in the Culture

Wars when his nomination to become President Bill Clinton's chairman of the National Endowment for the Humanities came under fire from right wing conservatives Hackney meticulously describes the background of ideological maneuvering that was behind not only the attacks on him but also the fierce campaign to bring down Clinton He says I believe my story illustrates how the Culture War and the current media environment combine to polarize discussion until the public has no chance to understand complex issues Not only are moderates trampled underfoot but the great gray areas where life is actually lived the areas of ambiguity and tradeoffs between competing values are rendered toxic to human habitation This is not healthy for a democracy

The Politics of Presidential Appointments Jinhee Jo, 2012 This dissertation is a series of essays that explore the presidential appointment process using formal models and statistical data analysis The first essay provides an answer to why appointments should be held up but eventually approved which is a dynamic problem that has previously been analyzed with a static approach by specifying a dynamic model which shows that the timing of Senate approval of presidential nominees depends on the president's popularity the ideological distance between the president and the Senate and their interaction The model's implications are empirically consistent with data on appellate court nominations from 1977-2004 The second essay attempts to think carefully about whom presidents should want to appoint those with preferences identical to the chief executive as is often argued or those whose preferences differ and show that when a politically appointed agency head cannot completely control her subordinates the president is often better off appointing non allies rather than allies Finally the third essay provides an explanation for why the president some times appoints an incompetent and why the Senate is willing to confirm such nomination Without assuming that political actors are inherently risk takers this essay identifies conditions generating institutionally induced risk taking where both the president and the Senate propose and approve an incompetent administrator in equilibrium The model corresponds with contemporary cases of seemingly incompetent administration *Leaves v vi*
