The Prize Of All The Oceans:

The Prize of All the Oceans, 1988 *Crusoe's Island* Andrew Lambert, 2016-09-13 From an acclaimed naval historian Crusoe's Island charts the curious relationship between the British and an island on the other side of the world Robinson Crusoe in the South Pacific The tiny island assumed a remarkable position in British culture most famously in Daniel Defoe's novel Andrew Lambert reveals the truth behind the legend of this place bringing to life the voices of the visiting sailors scientists and artists as well as the wonders tragedy and violence that they encountered *The Wager* David Grann, 2023-05-11 THE SUNDAY TIMES NUMBER ONE BESTSELLER LONGLISTED FOR THE 2023 BAILLIE GIFFORD PRIZE FOR NON FICTION The beauty of *The Wager* unfurls like a great sail one of the finest nonfiction books I've ever read Guardian The greatest sea story ever told Spectator I cannot think of anyone who would not love this book It is an extraordinary true story beautifully written Richard Osman A cracking yarn Grann's taste for desperate predicaments finds its fullest expression here Observer From the international bestselling author of *KILLERS OF THE FLOWER MOON* and *THE LOST CITY OF Z* a mesmerising story of shipwreck mutiny and murder culminating in a court martial that reveals a shocking truth On 28th January 1742 a ramshackle vessel of patched together wood and cloth washed up on the coast of Brazil Inside were thirty emaciated men barely alive and they had an extraordinary tale to tell They were survivors of His Majesty's ship the *Wager* a British vessel that had left England in 1740 on a secret mission during an imperial war with Spain While chasing a Spanish treasure filled galleon the *Wager* was wrecked on a desolate island off the coast of Patagonia The crew marooned for months and facing starvation built the flimsy craft and sailed for more than a hundred days traversing 2 500 miles of storm wracked seas They were greeted as heroes Then six months later another even more decrepit craft landed on the coast of Chile This boat contained just three castaways and they had a very different story to tell The thirty sailors who landed in Brazil were not heroes they were mutineers The first group responded with counter charges of their own of a tyrannical and murderous captain and his henchmen While stranded on the island the crew had fallen into anarchy with warring factions fighting for dominion over the barren wilderness As accusations of treachery and murder flew the Admiralty convened a court martial to determine who was telling the truth The stakes were life and death for whomever the court found guilty could hang **Iberian Visions of the Pacific Ocean, 1507-1899** R. Buschmann, 2014-10-28 In this work Buschmann incorporates neglected Spanish visions into the European perceptions of the emerging Pacific world The book argues that Spanish diplomats and intellectuals attempted to create an intellectual link between the Americas and the Pacific Ocean

The British Seaborne Empire Jeremy Black, Professor Jeremy Black, 2004-01-01 Britain's seaborne tradition is used to throw light on the British themselves the people with whom they came into contact and the British perception of empire The oceans and their shores rather than the mysterious interiors of continents certainly dominated the English perception of the transoceanic world in the sixteenth seventeenth and eighteenth centuries climaxing in the fascination with the Pacific in the

age of Captain Cook and continuing into the nineteenth century with Franklin in the Arctic and Ross in the Antarctic The oceans offered much more than fascination In England from the late sixteenth century maritime conflict and imperial strength were seen as important to national morale and reputation and without it there would have been no empire or at least not in the form it actually took **BOOK JACKET** **The British Empire** Jeremy Black, 2016-03-09 What was the course and consequence of the British Empire The rights and wrongs strengths and weaknesses of empire are a major topic in global history and deservedly so Focusing on the most prominent and wide ranging empire in world history the British empire Jeremy Black provides not only a history of that empire but also a perspective from which to consider the issues of its strengths and weaknesses and rights and wrongs In short this is history both of the past and of the present day discussion of the past that recognises that discussion over historical empires is in part a reflection of the consideration of contemporary states In this book Professor Black weaves together an overview of the British Empire across the centuries with a considered commentary on both the public historiography of empire and the politically charged character of much discussion of it There is a coverage here of social as well as political and economic dimensions of empire and both the British perspective and that of the colonies is considered The chronological dimension is set by the need to consider not only imperial expansion by the British state but also the history of Britain within an imperial context As such this is a story of empires within the British Isles Europe and later world wide The book addresses global decline decolonisation and the complex nature of post colonialism and different imperial activity in modern and contemporary history Taking a revisionist approach there is no automatic assumption that imperialism empire and colonialism were bad things Instead there is a dispassionate and evidence based evaluation of the British empire as a form of government an economic system and a method of engagement with the world one with both faults and benefits for the metropole and the colony **The Prize of All the Oceans** Glyndwr Williams, 2000

The Age of Resilience Jeremy Rifkin, 2022-11-01 A sweeping new interpretation of the history of civilization and a transformative vision of how our species will thrive on an unpredictable Earth The viruses keep coming the climate is warming and the Earth is rewilding Our human family has no playbook to address the mayhem unfolding around us If there is a change to reckon with argues the renowned economic and social theorist Jeremy Rifkin it is that we are beginning to realize that the human race never had dominion over the Earth and that nature is far more formidable than we thought while our species seems much smaller and less significant in the bigger picture of life on Earth undermining our long cherished worldview The Age of Progress once considered sacrosanct is on a deathwatch while a powerful new narrative the Age of Resilience is ascending In The Age of Resilience Rifkin takes us on a new journey beginning with how we reconceptualize time and navigate space During the Age of Progress efficiency was the gold standard for organizing time locking our species into the quest to optimize the expropriation commodification and consumption of the Earth's bounty at ever greater speeds and in ever shrinking time intervals with the objective of increasing the opulence of human society but at the expense of the

depletion of nature Space observes Rifkin became synonymous with passive natural resources while a principal role of government and the economy was to manage nature as property This long adhered to temporal spatial orientation writes Rifkin has taken humanity to the commanding heights as the dominant species on Earth and to the ruin of the natural world In the emerging era says Rifkin efficiency is giving way to adaptivity as the all encompassing temporal value while space is perceived as animated self organizing and fluid A younger generation in turn is pivoting from growth to flourishing finance capital to ecological capital productivity to regenerativity Gross Domestic Product to Quality of Life Indicators hyper consumption to eco stewardship globalization to glocalization geopolitics to biosphere politics nation state sovereignty to bioregional governance and representative democracy to citizen assemblies and distributed peerocracy Future generations suggests Rifkin will likely experience existence less as objects and structures and more as patterns and processes and come to understand that each of us is literally an ecosystem made up of the microorganisms and elements that comprise the hydrosphere lithosphere atmosphere and biosphere The autonomous self of the Age of Progress is giving way to the ecological self of the Age of Resilience The now worn scientific method that underwrote the Age of Progress is also falling by the wayside making room for a new approach to science called Complex Adaptive Systems modeling Likewise detached reason is losing cachet while empathy and biophilia become the norm At a moment when the human family is deeply despairing of the future Rifkin gives us a window into a promising new world and a radically different future that can bring us back into nature s fold giving life a second chance to flourish on Earth

Man for All Oceans Stan Grayson, 2017-05-16

In June 1898 three years and two months after departing Boston in his aged oyster sloop Spray Captain Joshua Slocum made land fall in New England and became the first person ever to sail alone around the world The voyage capped a lifetime of adventure for the indomitable Slocum who had advanced from seaman to captain during the challenging final years of commercial sail surviving hurricanes mutinies shipwreck and the death at sea of his beloved first wife Virginia Sailing Alone Around the World Slocum s book about his circumnavigation is a seafaring classic unmatched for adventure and literary verve and has never been out of print since its publication in 1900 Yet despite several biographies over the decades Slocum the man has remained unknowable to his legions of admirers the facts of his life and career as elusive as a ship on a fogbound sea Here is the real story of Slocum s Nova Scotia childhood his seafaring career and how he became an American citizen Grayson gives ample evidence of Slocum s uncanny genius as a navigator while also noting the occasional role that good luck played in his voyages including his odyssey from Brazil to the United States in the self designed and built 35 foot Liberdade And Grayson brings a sailor s perspective to Slocum s solo circumnavigation and mysterious disappearance at sea A fascinating appendix compares Sailing Alone Around the World with Thoreau s Walden and shows that Slocum s simple lifestyle and self sufficiency prefigured today s emphases on the environment and living responsibly Previously unpublished photographs bring Slocum s world to life and detailed maps trace the adventures of a sailor who knew the world like the back

of his hand This biography reads like an adventure narrative and will serve as the standard work on Joshua Slocum for years to come The IMLI Treatise On Global Ocean Governance David Joseph Attard,David M Ong,Dino Kritsiotis,2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system
