Sotto Guide 2001:

The Cambridge Critical Guide to Latin Literature Roy Gibson, Christopher Whitton, 2024-01-18 The Cambridge Critical Guide to Latin Literature offers a critical overview of work on Latin literature Where are we How did we get here Where to next Fifteen commissioned chapters along with an extensive introduction and Mary Beard's postscript approach these questions from a range of angles They aim not to codify the field but to give snapshots of the discipline from different perspectives and to offer provocations for future development The Critical Guide aims to stimulate reflection on how we engage with Latin literature Texts tools and territories are the three areas of focus The Guide situates the study of classical Latin literature within its global context from late antiquity to Neo Latin moving away from an exclusive focus on the pre 200 CE corpus It recalibrates links with adjoining disciplines history philosophy material culture linguistics political thought Greek and takes a fresh look at key tools editing reception intertextuality theory

Light Pollution Handbook Kohei Narisada, Duco Schreuder, 2004-11-30 Constituting the first holistic overview including practical remedies this handbook provides the background needed by anyone grappling with the complex issue of outdoor lighting and its effects It describes not only the problems that astronomers and other night sky observers face in reducing the problems of information loss due to light pollution as well as the problems lighting technologists face in optimising outdoor lighting installations that cause little or no light pollution The first part is directed to decision makers and managers of outdoor space and covers the areas of general interest culminating in recommendations to reduce the impact of light pollution The second part is directed primarily to scientists and engineers as a support to the design and maintenance of outdoor lighting installations with special reference to astronomical observations Elaborating issues from the first part these contributions include examples that refer to specific outdoor lighting projects and to more general policy and educational measures Written for designers of lighting equipment and managers of astronomical observatories but also aimed at the authorities and decision makers responsible for the organization and maintenance of the public space it will serve a good purpose in graduate or postgraduate curricula for scientists engineers economists and law students This handbook fills the gap that exists between astronomical textbooks engineering texts and popular brochures about light pollution
