Policy, and Practices in Curriculum History Deborah L. Morowski, Lynn M. Burlbaw, 2024-03-01 America's schools are constantly in the news today for safety concerns, contested curricula, teacher quality, test scores, and a variety of other topics. Although most people spend at least 12 years in school systems, they know little of the history or evolution of American schooling. The collection of papers assembled in this book are divided into three categories which greatly impacted American schooling: people, policy, and practices. This work seeks to shed light on what has occurred in curriculum history in the past so as to help readers develop a deeper understanding of how our system of schooling arrived at its current state. The first section of the book examines the stories of people who had an influence on schooling and education. The second section focuses on the curricula and programs that were utilized in schools and districts throughout the country. The final chapter of the book looks at decisions that had long ranging impact on educational policies. The chapters of this book offer a glimpse into the history of American schooling and those people, policies, and practices that influenced its development. It is the editors' hope that the work will spark interest in scholars and students of educational history to examine other past as well as present stories of educators to expand our understanding of the saga that is the American schooling experience. **Service**

life in today's world based on interviews with more than forty farm families. In this book, dozens of farm families from America's heartland detail the practices and values that relate to their land, work, and communities. Their stories reveal that those who make their living in agriculture, despite stereotypes of provincialism perpetuated by the media, are savvy to the influence of world politics on local issues. Gary Holthaus demonstrates how outside economic, governmental, legal, and business developments play an increasingly influential if not controlling role in every farmer's life. The swift approval of genetically modified crops by the federal government, the formation of huge agricultural conglomerates, and the devastating environmental effects of chemical fertilizers, pesticides, and herbicides are just a few issues buffeting family farms. *From the Farm to the Table* explores farmers' experiences to offer a deeper understanding of how we can create sustainable and vibrant land-based communities by adhering to fundamental agrarian values. Tells the story of modern agriculture through engaging interviews with men and women who make a living farming in southeastern Minnesota. In a tone reminiscent of Wendell Berry's *A Place on Earth*, he examines the far-reaching effects of genetically modified organisms, free trade agreements that nurture transnational corporate profit dependence on fossil fuel-derived chemicals, and the toll all this has taken on the land and farmers. *Library Journal*
