

Professional Sound Recordings

You can have sound files professionally recorded to your specification for use with Voipfone's IVR system or Voicemail. Experienced voice artists record your messages and return them to you as sound files so that you can upload them to your customised IVR or voicemail in the usual way.

The service costs £30 ex VAT for a single recording of up to 150 words for one company. If you require sound files for multiple company names you will need to place a separate order for each.

We aim to return the recording to you the next working day but this may vary according to demand.

Please check and check again to ensure the message is exactly how you want it to be recorded and any unusual words have pronunciation tips provided.

Early Sound Recordings Eva Moreda Rodriguez, Inja Stanović, 2023-02-28 The use of historical recordings as primary sources is relatively well established in both musicology and performance studies and has demonstrated how early recording technologies transformed the ways in which musicians and audiences engaged with music This edited volume offers a timely snapshot of a wide range of contemporary research in the area of performance practice and performance histories inviting readers to consider the wide range of research methods that are used in this ever expanding area of scholarship The volume brings together a diverse team of researchers who all use early recordings as their primary source to research performance in its broadest sense in a wide range of repertoires within and on the margins of the classical canon from the analysis of specific performing practices and parameters in certain repertoires to broader contextual issues that call attention to the relationship between recorded performance and topics such as analysis notation and composition Including a range of accessible music examples which allow readers to experience the music under discussion this book is designed to engage with academic and non academic readers alike being an ideal research aid for students scholars and performers as well as an interesting read for early sound recording enthusiasts
