Crap Kitchen Geoff Tibballs,2015-11-19 The worst cookbook ever packed with truly bizarre and utterly disgusting recipes from all over the world Ever since humankind produced its first foodie the culinary world has dished up some staggering confections which could best be described as acquired tastes dishes such as Virgin Boy Eggs eggs soaked in the urine of prepubescent boys live octopus which clutches at the diner s tongue and throat as it is swallowed and Beard Beer made from the yeast found in facial hair In northern Greenland the Inuit are fond of cramming as many as 500 dead auks small sea birds into an old seal skin which they place under a large rock until the birds have fermented into what has rightly been described as a sticky pungent toxic cheesy gloop Kiviak as it is called is eaten by biting off the birds heads and sucking out the juices The mighty Roman Empire was built on such delicacies as larks tongues stuffed thrush boiled flamingo and grilled cow s womb while the Tudors loved nothing more than a roast cockenthrice the head and upper body of a pig carefully stitched onto the lower body and legs of a turkey Today for those with an adventurous mindset and a robust life insurance policy there is no shortage of nauseating local delicacies to enjoy In China not only is tuna eyeball on the menu but also yak penis served whole In Vietnam one can enjoy the still beating heart of a freshly killed snake in Iceland raw puffin heart In the Philippines there is duck embryo to be had like a Kinder Surprise only containing a dead foetus instead of a toy In Sardinia they like nothing more than a nice bit of maggot infested cheese and the favourite tippie of Korean foodies is Ttongsul a wine made from the fermented faeces of a child Bon appetit

Surgical Remodeling in Heart Failure W. Brett,A. Todorov,M. Pfisterer,H.-R. Zerkowski,2012-12-06 Despite all efforts and success in medical treatment the incidence of end stage chronic heart failure is increasing Cardiac transplantation remains the only definite option however due to the shortage of donor organs very few people benefit Therefore surgery of end stage heart failure using conventional techniques has gained new interest after the introduction of the Batista operation However a clear surgical identification of the patients to be included in this group is lacking Left ventricular reduction surgery as well as reduction of the base of the heart using mitral annuloplasty or mitral valve replacement sparing both papillary muscles is used in selected patients with satisfying results and good survival Long term mechanical support with subsequent surgical remodeling or supporting myoplasty may result in a beneficial alternative to heart transplantation
