exchanged among end systems mobile users and content providers Advances in Security and Payment Methods for Mobile Commerce includes high quality research papers and industrial and practice articles in the areas of mobile commerce security and payment from academics and industrialists It covers research and development results of lasting significance in the theory design implementation analysis and application of mobile commerce security and payment **Network and Parallel Computing** Hai Jin,Daniel Reed,Wenbin Jiang,2005-11-16 This book constitutes the refereed proceedings of the IFIP International Conference on Network and Parallel Computing NPC 2005 held in Beijing China in November December 2005 The 48 revised full papers and 20 revised short papers presented together with 3 invited papers were carefully selected from a total of 320 submissions The papers are organized in topical sections on grid and system software grid computing peer to peer computing web techniques cluster computing parallel programming and environment network architecture network security network storage multimedia service and ubiquitous computing *Intrusion Detection in Distributed Systems* Peng Ning,Sushil Jajodia,Xiaoyang Sean Wang,2012-12-06 Intrusion Detection In Distributed Systems An Abstraction Based Approach presents research contributions in three areas with respect to intrusion detection in distributed systems The first contribution is an abstraction based approach to addressing heterogeneity and autonomy of distributed environments The second contribution is a formal framework for modeling requests among cooperative IDSs and its application to Common Intrusion Detection Framework CIDF The third contribution is a novel approach to coordinating different IDSs for distributed event correlation Information Security and Ethics: Concepts, Methodologies, Tools, and Applications Nemati, Hamid,2007-09-30 Presents theories and models associated with information privacy and safeguard practices to help anchor and guide the development of technologies standards and best practices Provides recent comprehensive coverage of all issues related to information security and ethics as well as the opportunities future challenges and emerging trends related to this subject *Guide to Reliable Internet Services and Applications* Charles R. Kalmanek,Sudip Misra,Yang (Richard) Yang,2010-06-09 An oft repeated adage among telecommunication providers goes There are ve things that matter reliability reliability reliability time to market and cost If you can t do all ve at least do the rst three Yet designing and operating reliable networks and services is a Herculean task Building truly reliable components is unacceptably expensive forcing us to c struct reliable systems out of unreliable components The resulting systems are inherently complex consisting of many different kinds of components running a variety of different protocols that interact in subtle ways Inter networkssuch as the Internet span multiple regions of administrative control from campus and cor rate networks to Internet Service Providers making good end to end performance a shared responsibility borne by sometimes uncooperative parties Moreover these networks consist not only of routers but also lower layer devices such as optical switches and higher layer components such as rewalls and proxies And these components are highly con gurable leaving ample room for operator error and buggy software As if that were not dif cult enough end users understandably care about

the performance of their higher level applications which has a complicated relationship with the behavior of the underlying network Despite these challenges researchers and practitioners alike have made trem dous strides in improving the reliability of modern networks and services   **Trustworthy Computing and Services** Yuyu Yuan,Xu Wu,Yueming Lu,2013-01-05 This book constitutes the refereed proceedings of the International Standard Conference on Trustworthy Distributed Computing and Services ISCTCS 2012 held in Beijing China in May June 2012 The 92 revised full papers presented were carefully reviewed and selected from 278 papers The topics covered are architecture for trusted computing systems trusted computing platform trusted systems build network and protocol security mobile network security network survivability and other critical theories and standard systems credible assessment credible measurement and metrics trusted systems trusted networks trusted mobile network trusted routing trusted software trusted operating systems trusted storage fault tolerant computing and other key technologies trusted e commerce and e government trusted logistics trusted internet of things trusted cloud and other trusted services and applications   Web Services Liang-Jie Zhang,2004-09-23 Welcometotheproceedingsofthe2004EuropeanConferenceonWebServices ECOWS 2004 ECOWSisoneoftheleadinginternationalconferencesfocusingonWebservices ECOWS2004wasaforumforresearchersandpractitionersfromacademiaandindustry to exchange information regarding advances in the state of the art and practice of Web services identify emerging research topics and de ne the future directions of Web services computing ECOWS 2004 had a special interest in papers that contribute to the convergence of Web services Grid computing e business and autonomic computing and papers that apply techniques from one area to another This conference was called the International Conference on Web Services Europe in 2003 ECOWS 2004 was a sister event of the International Conference onWeb Services 2004 ICWS 2004 which attracted more than 250 registered participants in San Diego USA Web services are characterized by network based application components and a service oriented architecture using standard interface description languages and u form communicationprotocols Industrial applicationdomainsforWebservicesinclude business to business integration business process integration and management c tent management e sourcing composite Web services creation design collaboration for computer engineering multimedia communication digital TV and interactive Web solutions Recently Grid computing has also started to leverage Web services to de ne standard interfaces for business Grid services and generic reusable Grid resources The program of ECOWS 2004 featured a variety of papers on topics ranging from Web services and dynamic business process composition to Web services and process management Web services discovery Web services security Web services based app cations for e commerce Web services based Grid computing and Web services solu ons   **Algorithmic Applications in Management** Nimrod Megiddo,Yinfeng Xu,Nancy Alonstioti,Binhai Zhu,2005-06-02 This book constitutes the refereed proceedings of the First International Conference on Algorithmic Applications in Management AAIM 2005 held in Xian China in June 2005 The 46
