Social Atlas Of London:

A Social Atlas of London John Shepherd, John Westaway, Trevor Lee, 1974 *London in the 1690s* Craig Spence, 2000

At the end of the seventeenth century London was about to become the largest and wealthiest city in the western world One in ten of England's population lived in the capital which also housed a vast proportion of the kingdom's riches That wealth combined with the great international trade flowing through its wharves and warehouses earned the city the description the vitals of the commonwealth Analysing the unique and extensive documentary sources for this significant decade the author describes and explores a number of key topographic social and economic measures Importantly and so far as the sources allow seventeenth century London is treated throughout the analysis as a single entity a metropolis comprising the City and the sprawling suburbs outside London in the 1690s guides the reader the development of the built environment and the vital economic and social patterns indicated by property values and the density of households It includes discussions of London's elite the distribution of the male and female householders and broad patterns of wealth Supported by extensive statistical tables and maps the book is also illustrated with images from the period This fascinating atlas makes a major contribution to the field of early modern urban studies and will interest both the established scholar and the student It also serves as an introduction to the extensive database on the decade held at the Centre for Metropolitan History **London Lives** Tim Hitchcock, Robert Brink Shoemaker, 2015-12-03 This book surveys the lives and experiences of hundreds of thousands of eighteenth century non elite Londoners in the evolution of the modern world People and places Dorling, Daniel, Thomas, Bethan, 2004-06-30 People and places A 2001 Census atlas of the UK provides an at a glance guide to social change in the UK at the start of the new millennium It is the first comprehensive analysis of the 2001 Census and offers unique comparisons with the findings of the previous Census a decade ago Over 500 full colour maps covering 125 topics clearly illustrate the state of UK society today and how it is changing The trends are explained and elaborated upon in the accompanying text Using population maps in addition to conventional maps the atlas covers all the major census topics at local authority level Key features include an illuminating graphic summary of over 100 000 key demographic statistics new cartographic projections and techniques used throughout appendix incorporating rankings for 25 selected topics by local authority comparison with the 1991 census to identify national and local trends and up to date analysis and discussion of the implications of current trends for future policy This authoritative atlas is essential reading for those interested in the current social geography of the UK how it has changed and how it appears to be changing including for planners in local authorities health authorities and a wide range of statutory and voluntary organisations It is also an invaluable resource for policy makers journalists politicians students and academics interested in human geography and social change Women Attached Jacqueline Tivers, 2024-11-20 Originally published in 1985 Women Attached was one of the first empirical studies in geography to deal with the special problems of women with young children Even within sociology and psychology there were

very few studies in this area at the time Within geography the study of this population sub group was certainly a new departure However it was impossible to make meaningful sense of the structure of daily lives and activities of women without taking in to account the nature and impact of constraints on such activities Young children being the most clearly visible constraint in women s lives Therefore one aim of the research project was to relate empirical findings to the existing social science literature dealing with constraints on activities This book was an attempt to redress the balance slightly in favour of women s activities and specifically focuses on a group of women who had only rarely been the subject of research interest at the time Today it can read in its historical context A Bibliography of British History, 1914-1989 Keith Robbins,American Historical Association,Royal Historical Society (Great Britain),1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index **The First British-Soviet Geographical Seminar** F. E. Ian Hamilton,2015-12-04 The First British Soviet Geographical Seminar contains the scientific reports prepared by the participants of First British Soviet Geographical Seminar held in Great Britain on May 9 20 1978 The seminar focuses on tendencies in the development of contemporary trends and methods of scientific geographical studies in Soviet Union and Great Britain Organized into 16 chapters this book begins with a discussion on the contemporary British geography and modern Soviet geography Subsequent chapters explore the use of minicomputers in geography teaching expanded model of curriculum development and diffusion in education postgraduate research students in British universities research and application in British geomorphology and the Soviet physical and biological geography Other chapters detail landscape protection and development control aims and implementation in British urban and regional planning main methods of systems analysis relevant to urban and regional modeling problems of the inner city and the statistical and cartographic methods of analyzing spatial patterns of mortality The geography of mineral supply socio economic geography in the U S S R and the possibilities for future British Soviet co operation in geography are also addressed **Biographical Memoirs of Fellows, VII** Ron Johnston,2008-12-25 Seventeen obituaries of recently deceased Fellows of the British Academy Shackleton Bailey James Barr William Beasley Lord Blake Julian Budden Lord Bullock Robert Carson Laurence Cohen Charles Feinstein Henry Gifford Peter Holt Emrys Jones Robert Megarry Edward Oates Maurice Wiles Brian Woledge Austin Woolrych **History and GIS** Alexander Lünen,Charles Travis,2012-12-05 Geographical Information Systems GIS either as standard GIS or custom made Historical GIS HGIS have become quite popular in some historical sub disciplines such as Economic and Social History or Historical Geography Mainstream history however seems to be rather unaffected by this trend More generally speaking Why is it that computer applications in general have failed to make much headway in history departments despite the first steps being undertaken a good forty years ago With the spatial turn in full swing in the humanities and many historians dealing with spatial and geographical questions one would think GIS

would be welcomed with open arms Yet there seems to be no general anticipation by historians of employing GIS as a research tool As mentioned HGIS are popular chiefly among Historical Geographers and Social and Economic Historians The latter disciplines seem to be predestined to use such software through the widespread quantitative methodology these disciplines have employed traditionally Other historical sub disciplines such as Ancient History are also very open to this emerging technology since the scarcity of written sources in this field can be mitigated by inferences made from an HGIS that has archaeological data stored in it for example In most of Modern History however the use of GIS is rarely seen The intellectual benefit that a GIS may bring about seems not be apparent to scholars from this sub discipline and others This book wants to investigate and discuss this controversy Why does the wider historian community not embrace GIS more readily While one cannot deny that the methodologies linked with a GIS follow geographical paradigms rather than historical ones the potential of GIS as a killer application for digital historical scholarship should be obvious This book brings together authors from Geography and History to discuss the value of GIS for historical research The focus however will not be on the how but on the why of GIS in history

The Politics of Location Andrew Kirby, 2015-12-14 This book originally published in 1982 begins with an examination of space and its role in the process of public provision and collective consumption Variations in provision are linked to the Weberian notion of social status and political struggles over consumption and externality issues Health care and education are considered in spatial contexts and the whole basis of the electoral system is also discussed together with geographic underpinnings In each case emphasis is placed on the jurisdictional organization of space by public bodies The author examines the various examples of spatial cleavages in which political events are redirected by issues such as nuclear power airport location road construction and urban renewal

Geography of Elections Peter J. Taylor, Ron Johnston, 2014-10-03 Within an international framework this work provides a fully comprehensive approach to the geographical coverage of elections Numerous applications of ideas and concepts from human geography are incorporated into a new political context illustrating the manner in which electoral patterns reflect and help produce the overall geography of a region or state Discussions of various topics are well supported by numerous maps and diagrams which help clarify arguments and serve to define elections within their basic geographical context

At Home in the Eighteenth Century Stephen G. Hague, Karen Lipsedge, 2021-09-17 The eighteenth century home in terms of its structure design function and furnishing was a site of transformation of spaces identities and practices Home has myriad meanings and although the eighteenth century in the common imagination is often associated with taking tea on polished mahogany tables a far wider world of experience remains to be introduced *At Home in the Eighteenth Century* brings together factual and fictive texts and spaces to explore aspects of the typical Georgian home that we think we know from Jane Austen novels and extant country houses while also engaging with uncharacteristic and underappreciated aspects of the home At the core of the volume is the claim that exploring eighteenth century domesticity from a range of disciplinary vantage points can yield

original and interesting questions as well as reveal new answers Contributions from the fields of literature history archaeology art history heritage studies and material culture brings the home more sharply into focus In this way *At Home in the Eighteenth Century* reveals a more nuanced and fluid concept of the eighteenth century home and becomes a steppingstone to greater understanding of domestic space for undergraduate level and beyond *A Political Biography of Alexander Pope* Pat Rogers,2015-10-06 This is the first study to assess the entire career of Alexander Pope 1688-1744 in relation to the political issues of his time *At Vanity Fair* Kirsty Milne,2015-05-12 *At Vanity Fair* tells the story of Bunyan's powerful metaphor exploring how Vanity Fair was transformed from an emblem of sin and persecution into a showcase for celebrity wealth and power This literary history focusing on reception adaptation and influence traces the fictional representation of Vanity Fair over three centuries from John Bunyan's masterpiece *The Pilgrim's Progress* 1678 to William Makepeace Thackeray's own *Vanity Fair* 1847-8 It explores the influence of anonymous journalists and booksellers alongside well known authors including Ben Jonson Samuel Richardson and Thomas Carlyle Over time Bunyan's dystopian fantasy has been altered and repurposed to characterise consumer capitalism channelling memories that inform and unsettle modern hedonism By tracking the idea of Vanity Fair against this shifting background the book illuminates the relationship between the individual and the collective imagination between what is culturally available and what is creatively impelled

Geographies of an Imperial Power Jeremy Black,2018-01-06 From explorers tracing rivers to navigators hunting for longitude spatial awareness and the need for empirical understanding were linked to British strategy in the 1700s This strategy in turn aided in the assertion of British power and authority on a global scale In this sweeping consideration of Britain in the 18th century Jeremy Black explores the interconnected roles of power and geography in the creation of a global empire Geography was at the heart of Britain's expansion into India its response to uprisings in Scotland and America and its revolutionary development of railways Geographical dominance was reinforced as newspapers stoked the fires of xenophobia and defined the limits of cosmopolitan Europe as compared to the barbarism beyond Geography provided a system of analysis and classification which gave Britain political cultural and scientific sovereignty Black considers geographical knowledge not just as a tool for creating a shared cultural identity but also as a key mechanism in the formation of one of the most powerful and far reaching empires the world has ever known Census Mapping Survey Prithvish Nag,1984 Country reports with reference to selected countries from all the continents *Ingenious Trade* Laura Gowing,2021-12-16 *Ingenious Trade* recovers the intricate stories of the young women who came to London in the late seventeenth century to earn their own living most often with the needle and the mistresses who set up shops and supervised their apprenticeships Tracking women through city archives it reveals the extent and complexity of their contracts training and skills from adolescence to old age In contrast to the informal unstructured and marginalised aspects of women's work this book uses legal records and guild archives to reconstruct women's negotiations with city regulations and bureaucracy It shows single women wives and

widows establishing themselves in guilds both alongside and separate to men in a network that extended from elites to paupers and around the country Through an intensive and creative archival reconstruction Laura Gowing recovers the significance of apprenticeship in the lives of girls and women and puts women's work at the heart of the revolution in worldly goods

Power and Urban Space in Pre-Modern Holland Clé Lesger, 2024-02-22 Cities and urban societies have many faces In this study the pre modern cities of Holland are presented as arenas where power relations between social classes are expressed in a more or less permanent appropriation of physical space and through discursive strategies The continuity of the power relations in the cities of Holland spanning centuries makes it urgent to look not only at the assumption of urban space as an expression of power relations within society but also at the contribution of this appropriation to the acceptance and continuity of the existing power relations in pre modern Holland Within this broad area extensive attention is paid to the very prominent and enduring appropriation of urban space in the field of housing the less permanent but violent appropriation of urban space during the public execution of scaffold punishments the maintenance of public order by civic militias and appropriation during riots and revolts In addition city descriptions maps and pictures of the pre modern cities of Holland are scrutinised for what they can reveal about the appropriation of urban spaces These themes each have an extensive historiography but they have never been brought together in an interpretative framework that fits in with Pierre Bourdieu's model of society and the work of especially John Allen on power until now

Cultural Capitals Karen Newman, 2009-07-26 Karen Newman demonstrates that speculation and capital the commodity the crowd traffic and the street often thought to be historically specific to nineteenth century urban culture were in fact already at work in early modern London and Paris Newman challenges the notion of a rupture between premodern and modern societies and shows how London and Paris became cultural capitals Drawing upon poetry plays and prose by writers such as Shakespeare Scudery Boileau and Donne as well as popular materials including pamphlets ballads and broadsides she examines the impact of rapid urbanization on cultural production

Accidents and Violent Death in Early Modern London, 1650-1750 Craig Spence, 2016 Between the mid seventeenth and mid eighteenth century more than 15 000 Londoners suffered sudden violent deaths While this figure includes around 3 000 who were murdered or committed suicide the vast majority of fatalities resulted from unexplained violent deaths or accidents In the early modern period accidental and disorderly deaths from drowning falls stabbing shooting fires explosions suffocation and animals and vehicles among others were a regular feature of urban life This book is a critical study of the early modern accident Drawing on the weekly London Bills of Mortality parish burial registers newspapers and other related documents it examines accidents and other forms of violent death in the city with a view to understanding who among its residents encountered such events how the bureaucracy recorded and elaborated their circumstances and why they did so and what practical responses might follow Additionally the book explores the way in which these events were transformed to become a recurring cultural trope in oral textual and visual narratives of

metropolitan life and how sudden deaths were understood by early modern mentalities By the mid eighteenth century providential explanations were giving way to a more mechanically rational view that saw accident events as threats to be managed rather than misfortunes to be explained
