How should the state react Ann Larabee's *The Wrong Hands* a remarkable history of do it yourself weapons manuals from the late nineteenth century to the recent Boston Marathon bombing traces how efforts to ferret out radicals willing to employ ever more violent methods fueled the growth of the American security state But over time the government's increasingly forceful targeting of violent books and ideas not the weapons themselves threatened to undermine another core American right free expression In the 1886 Haymarket Square bombing a new form of revolutionary violence that had already made its mark in Europe arrived in the United States At the subsequent trial the judge allowed into evidence Johann Most's infamous *The Science of Revolutionary Warfare* which allegedly served as a cookbook for the accused Most's work was the first of a long line of explosive manuals relied on by radicals By the 1960s small publishers were drawing from publicly available US military sources to produce works that catered to a growing popular interest in DIY weapons making The most famous was *The Anarchist Cookbook* 1971 which soon achieved legendary status and a lasting presence in the courts Even novels such as William Pierce's *The Turner Diaries* have served as evidence in prosecutions of right wing radicals More recently websites explaining how to make all manner of weapons including suicide vests have proliferated The state's right to police such information has always hinged on whether the disseminators have legitimate First Amendment rights Larabee ends with an analysis of the 1979 publication of instructions for making a nuclear weapon which raises the ultimate question should a society committed to free speech allow a manual for constructing such a weapon to disseminate freely Both authoritative and eye opening *The Wrong Hands* will reshape our understanding of the history of radical violence and state repression in America
