of the ordinary legislative procedure's potential democratic qualities and examines whether it fulfils democratic criteria how the procedure works in practice and whether it has the necessary democratic clout The author provides both a theoretical discussion and an empirical assessment of what role the principle of democracy could play in the EU Filling a gap in EU legislative studies and contributing to the debate on the European democratic deficit Democratic Decision making in the EU will be of interest to students and scholars of European Union politics legislative studies and deliberative democracy

The European Union Beyond the Polycrisis? Jonathan Zeitlin, Francesco Nicoli, 2020-06-09 The European Union beyond the Polycrisis explores the political dynamics of multiple crises faced by the EU both at European level and within the member states In so doing it provides a state of the art overview of current research on the relationship between politicization and European integration The book proposes that the EU s multi dimensional crisis can be seen as a multi level politics trap from which the Union is struggling to escape The individual contributions analyze the mechanisms of this trap its relationship to the multiple crises currently faced by the EU and the strategies pursued by a plurality of actors the Commission the European Parliament national governments to cope with its constraints Overall the book suggests that comprehensive grand bargains are for the moment out of reach although national and supranational actors can find ways of

relaxing the politics trap and in so doing perhaps lay the foundations for more ambitious future solutions This book dedicated to the exploration of the political dynamics of multiple simultaneous crises offers an empirical and theoretical assessment of the existing political constraints on European integration Analysing domestic and European political reactions to the EU s polycrisis and assessing how EU institutions national governments and broader publics have responded to a new era of politicization The European Union beyond the Polycrisis will be of great interest to scholars of European politics and the EU as well as professionals working in EU institutions national administrations and European advocacy groups The chapters were originally published as a special issue of the Journal of European Public Policy Technocracy and the Law Alessandra Arcuri, Florin Coman-Kund, 2021-05-27 Technocratic law and governance is under fire Not only populist movements have challenged experts NGOs public intellectuals and some academics have also criticized the too close relation between experts and power While the amount of power gained by experts may be contested it is unlikely and arguably undesirable that experts will cease to play an influential role in contemporary regulatory regimes This book focuses on whether and how experts involved in policymaking can and should be held accountable The book divided into four parts combines theoretical analysis with a wide variety of case studies expounding the challenges of holding experts accountable in a multilevel setting Part I offers new perspectives on accountability of experts including a critical comparison between accountability and a virtue ethical framework for experts a reconceptualization of accountability through the rule of law prism and a discussion of different ways to operationalize expert accountability Parts I IV organized around in depth case studies shed light on the accountability of experts in three high profile areas for technocratic governance in a European and global context economic and financial governance environmental health and safety governance and the governance of digitization and data protection By offering fresh insights into the manifold aspects of technocratic decisionmaking and suggesting new avenues for rethinking expert accountability within multilevel governance this book will be of great value not only to students and scholars in international and EU law political science public administration science and technology studies but also to professionals working within EU institutions and international organizations
