Technological Change Its Impact On Man And Society Harvard Studies In Technology And Society:

Technological Change: Its Impact on Man and Society Emmanuel G. Mesthene, 1970 Social research study of the impact of technological change and innovation on social change in the USA Annotated bibliography pp 96 to 124 and references Under Technology's Thumb William Leiss, 1990 Lucid and trenchant essays on the philosophy of nature arguing for an attitude of respect rather than domination of the environment We have according to Leiss communications Simon Fraser U no obligation to accept the imposition of new technologies but even if we do accept technological innovation we retain the right and duty to shape the applications and results according to our vision of the good society Annotation copyrighted by Book News Inc Portland OR Jacques Ellul and the Technological Society in the 21st Century Helena M. Jerónimo, José Luís García, Carl Mitcham, 2013-07-08 This volume rethinks the work of Jacques Ellul 1912 1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society Alternative Futures in American Education United States. House. Committee on Education and Labor, 1972 **Sociology as Social Criticism** T. B. Bottomore, 2010 First published in 1975 this collection of essays embodies a conception of sociological thought as a critical analysis of social theories and doctrines of social institutions and political regimes of recent social movements They deal in particular with some conservative versions of sociology and with attempts to develop more radical theories they extend the author's previous writings on classes elites and politics and they analyse some of the problems of socialism in the late twentieth century There is a close unity of theme throughout the book in its critical attempt to formulate new intellectual bases for future radical and egalitarian politics It is written with that quiet wisdom and impressive command of sources which readers have come to associate with Professor Bottomore's work
